Preface

What is a peak register? It's like a guest book at a wedding. Visitors to the summit sign their names and perhaps make a comment or two. Why would one want to waste time on a book of signatures? We have reasons: Some guests wrote interesting things, additional information on some of the ascenders has been added in this book, and one sees facts which may have general interest. The reader familiar with California rock climbing will see names in the Starr King registers that have a place in the history of Yosemite rock climbing and elsewhere.

The skeptic may also ask, with so many peaks is there anything special about Mt. Starr King and its place in climbing history? Starr King is located near Yosemite Valley and, being a relatively inaccessible summit, was a target of early climbers. The appeal of the peak has endured through the years and generation after generation has climbed it. As techniques improved, new and more difficult routes were put up. The approach distance is such that the climbs are remote and not overrun. Finally, the climbs result in a true mountain summit, something which many Yosemite Valley rock climbs do not realize. Roped climbing was used for about 95 percent of the ascents in the register books.

The Sierra Club placed a loose leaf sign in register on Mt. Starr King in 1931. It was replaced in 1937 with a bound book. Of those who climbed the peak, about 1364 entries were made in the registers from 1931 through 1981. The registers were removed by Mark Spencer¹ around 1992 and given to Robin Ingraham² who sent the originals to the Bancroft Library in Berkeley. I understand that two newer registers are now on the peak and cover the period 1981 to the present (2011).

In September 1970 the Sierra Club Board of Directors designated The Bancroft Library of the University of California at Berkeley as the official depository for

¹ Author of *Southern Yosemite Rock Climbs* with Shirley Spencer.

² Robin Ingraham, mountaineer, graphic designer, photographic artist, and peak register preservationist had an article in the National Geographic Adventure magazine and Sierra, the Sierra Club publication, about saving old peak registers.

the club's archives. The large collection of records, photographs and other memorabilia known as the "Sierra Club Papers" is thus permanently protected. If one wishes to see the Starr King Registers in person, one may visit the library and request the Sierra Club Peak Register for Mt Starr King, CATALOG RECORD BANC MSS 71/293 carton 17. Alternatively, one may purchase a copy of the microfilm of the files or download this book.

I ran across the registers when researching a biography of William Kat, my grandfather and the man who climbed Mt. Starr King more times than anyone else as recorded in these two registers. After the biography was complete, I decided the registers would have general interest, especially if associated with events and accomplishments of the lives of the people who had made their jottings. I felt I was competent to make this effort because I had been a rock climber with ascents at Yosemite Valley and Tahquitz Rock as well as having practiced bouldering at Stoney Point near Chatsworth and Indian Rock in Berkeley. In a quick scan of the register, I recognized a number of names, many of some fame in the world of Yosemite rock climbing.

The registers have surprises. For example, an argument was held about who climbed the peak in the early days. The greatest number ascenders in winter, not necessarily an easy or safe thing to do, came not from the mountaineering elite, but from mass outings of students from a small college. Some lonely men left notes asking others to contact them – guaranteed not to get much of a result considering the average number of ascenders was about 27 per year for the 51 years of the registers, and the average number of women was four! Famous climbers, physicists, mathematicians, authors, and several who had been or would be incarcerated made the climb. An interesting group, to be sure.

Social change was evident in the registers. Early register entries had no references to drugs, gross humor or impolite language, so one has something to anticipate in reading. The register is an historic document, and nothing was deleted from the actual pages. However, I retained editorial control over the transcription and did not render some gratuitous profanity. I alert the reader in those cases.

I made this book a personal writing by putting in remembrances and comments in some places. I cross-referenced names to a list of first ascents in Yosemite Valley at the Yosemite Climbing Association's web site which was compiled by Ed

Hartouni. Many who climbed Mt. Starr King were climbers of note. I focused on the Yosemite Valley area when looking to see what else a person who ascended Mt. Starr King may have done, for Yosemite is viewed by many as the litmus test for rock climbing. There were also those without Yosemite credentials who climbed Starr King and went on to other mountain areas of the world. And some died on climbs, both in Yosemite and elsewhere.

The character of the climbers who made it up Mt. Starr King has been rounded out a little using the Internet as a reference, and some searches produced surprising results of interesting careers. I wish I could have said more about everyone who signed in, but it is hard to find information that can be pegged to a name unless there are clues in the entry. For example, Bill Hooker put the initials for the American Alpine Club and the Harvard Mountaineering Club by his name, so I could find out a lot about him. His partner was Fred Smith, but without other information it was impossible to find out more about him as there are many Fred Smith's to be found on an Internet search. Women often change their names when they marry breaking the trail of identity for the casual researcher, so additional information about them may be impossible to find.

I spent more time on the early entries because this is a book of history, and as time fades the older information becomes harder to find.

One might view this as a stream of consciousness book about the register. Everyone wasn't treated the same, because on any particular day I felt differently than the day before. The registers should be considered a work of fiction to some degree. No one swore to tell the truth when he or she signed the register and added comments, and some did not.

The stories about Starr King are not so much the actual climbs, but the people who made the climbs - Mark Goebel

This book is dedicated to the memory of William Kat, early Yosemite climber,

September 1937 William Kat in
Yosemite

***and to those who have made it up the peak and those who will make it
up the peak one day...***

Climbing is dangerous. Climb at your own risk.

You can be seriously injured or killed in this activity.

How to Read This Book

This book is designed to be read with each register page facing its transcription for easy back and forth. If you are reading it on a computer, set the view for two pages.

Statistical Tables and Graphs

Tabulations of facts about ascents of Mt. Starr King, as stated in the entries, for the 51 years of the registers reveal interesting trends and behavior. For those who wish to go directly to the tables, they are listed below:

1. Number of Climbers Ascending Mt. Starr King by Year.....	39
2. Number of Ascents by Month of the Year.....	75
3. Percent Climbs by Route Taken on the Dome.....	85
4. Percent Climbs by Approach Taken.....	100
5. Number of Ascents Per Climber.....	115
6. Number of Ascents by Party Size.....	147
7. Ascents by Gender.....	349

The tables and graphs are scattered through the book to fill blank pages.

A Short History of Mt. Starr King

Mt. Starr King, 9081 ft., from the Glacier Point Road in a thunderstorm

Tectonic plates bumped and one slipped under the other. The earth's crust crinkled upwards and plutons, giant bubbles of magma, formed and ascended slowly in the general uplift beneath the overlaying sedimentary rocks. The plutons cooled to granite, and through the ages the overlaying soft rock surface was rubbed clean by wind, water and ice revealing the granite domes of the Sierra Nevada. Eons pass.

Humanity in large numbers descended on California for gold in 1848 and explored everything over the next few years looking for the intriguing yellow metal. The

Yosemite area, first visited by organized travel in 1855, became widely known for its beauty. One visitor was Thomas Starr King, a Unitarian minister in San Francisco who was struck by the beauty of Yosemite and coined a phrase, “Yosemites of the soul” to describe the best and most beautiful of man’s inner feelings. Starr King campaigned for Lincoln for President and Stanford for governor of California. He was an anti-slavery unionist, and after his death a peak was named for him near Yosemite Valley, Mt. Starr King.

Although not visible from the floor of Yosemite Valley, Mt. Starr King presents a striking view from the road to Glacier Point. The peak is also visible from Half Dome if one hikes the trail to the top. Mt. Starr King was considered inaccessible by early geological surveys, so the question was, who would climb it?

The First through Fourth Ascents

From recent research by Harv Galic,³ the first ascent of Mt. Starr King was by George Blake Bayley, Sidney Vanuxem Smith and Manuel Flores in August 1876, a change to what was in the widely accepted historical record. Their route went up the northeast side which is the left-hand skyline of the dome where the trees reach the highest point as seen in the photograph on the preceding page.

The second ascent was made by George B. Bayley and James Dix Schuyler on June 25, 1877.⁴ This was originally said, in error, to be the first ascent.

³ Harv Galic, "Earliest Ascents to the Summit of Mt. Starr King in Yosemite" posted at <http://starr-king.s3-website-us-west-1.amazonaws.com/>. Since 1932 the first ascenders of Mt Starr King were given erroneously as G.B. Bayley and E.S. Schuyler, based on the “Mountaineering Notes” by Francis Farquhar, pp 115-118, Sierra Club Bulletin, February, 1932. Farquhar wrote his article about the early climbing history of Mt. Starr King, but he lacked critical pieces of evidence which Harv Galic put together in his well-documented paper.

⁴ Letter dated July 11, 1880 from J.D. Schuyler to the Editor of the Sacramento Bee published July 14, 1880 about his ascent with Bayley in 1877. He also says that on the first ascent Bayley was with two others, H.C. Smith and a Mexican. Careful research by Harv Galic led to identifying the two as Sidney Vanuxem Smith and Manuel Flores.

The third ascent was made via the southeast saddle in 1877 on August 23rd by George Anderson, James Hutchings and J. B. Lumbert. Anderson was the man who pioneered the first ascent of Half Dome, close to where the cables run today, and he and his party were surprised to find evidence of someone having been on the summit of Mt. Starr King before them. The next day the peak was ascended again by Anderson and Hutchings who brought Mrs. A.L. Sweetland and S.A. Walker with them. The Anderson route approximates the right-hand skyline from the obvious saddle between the lower two domes, again as seen in the photograph on page 13.

No published accounts of ascents of Mt. Starr King between 1877 and 1931 were generally known when interest revived in climbing the peak. The Register Committee of the Sierra Club, a conservation organization formed in 1892 by John Muir and others, decided to place an aluminum box with a register on the summit so those who climbed could record their ascents. On July 4th 1931, three climbers place the box and register.

Are Sierra Club Peak Registers Managed?

Registers have been placed in a wild, unsupervised environment, so they may be damaged by weather, vandalized, taken, or pages torn out for souvenirs. Here is what some said about treatment of the Starr King register in the register itself:

Dec 31, 1963 Some dolt left the register box upside down so the book is soaking wet...

1973 Please don't rip out pages containing famous climber's names...

To be fair, the 1963 entry does not mean the people in the preceding entry in the register are dolts. Someone else who did not sign the register may have left the box improperly secured. The effect of wetting the book was to make entries of many peak ascenders difficult to read. The 1973 entry says a person with knowledge of the register noticed pages missing.

Another type of activity that might be classified as register abuse is the entry of bogus names. Although Janus is a surname, if it is associated with the first name of Hugh the combination raises suspicion.

If a peak register is filled, then it may leave the summit. The disposition of registers is something of a mystery to many climbers. The Board of Directors of the Sierra Club voted to place the club's historical records with The University of California's Bancroft Library in 1970. The first donation included some summit registers. The Bancroft says registers continue to be added to the collection by club members and other individuals. On the other hand, I was told the Sierra Peaks Section of the Sierra Club had a policy to donate retired registers to the library at the University of California at Los Angeles. The ultimate disposition of a register may be a matter of luck, and, as noted in an entry in the Mt. Starr King Register, a matter of frustration to some peak ascenders who wonder what happened to that great old register they saw before or heard about:

9/6/80 1:20 PM. Great register. Nothing is worse than the Sierra Club continually taking down the registers to god knows where...

A note on a folder indicates that the registers in this book were given to the Bancroft Library in 1992 by the Sierra Peaks Section of the Sierra Club, ten years after removal from the peak. As mentioned in the Preface, the registers were removed and ultimately sent to the Bancroft Library about 1992 by Mark Spencer⁵ who said, "Mt. Starr King is probably one of the few peaks that has such a select and intact register history. I checked my copy of the register and did not find anything different than what you were provided [by microfilm from the Bancroft Library]. When I removed the register, Robin Ingraham photocopied the entire book, sent the copies to me and must have sent the original to the Bancroft, where you found it." Ingraham has a web site which has information about register preservation at <http://robiningraham.com/summitregisters.html>

All register pages quoted or reproduced here are from a microfilm roll of the Mt. Starr King Register, Sierra Club Mountain Registers and Records, BANC MSS 71/293c, The Bancroft Library, University of California, Berkeley. Each page contains its own dates if a specific reference is required. The quality of the

⁵ Author of *Southern Yosemite Rock Climbs* with Shirley Spencer.

reproduction reflects what was on the microfilm. The microfilm size is 35mm and I scanned it more or less the way one would scan slides.

Recorded History - the Registers

The format of this book puts hand written entries from the register on one page, and the same information transcribed into typed text on facing page. In addition to the register itself, footnotes and additional text are also included.

We begin with the first register, a loose-leaf notebook, place by three climbers, Eldon Dryer, Warren Loose and Judd Boynton on July 4, 1931.

The Loose Leaf Register
1931-1937

The Sierra Club

Register Box No. _____

Deposited on summit of

Star King

Date

July 4, 1931 By *Dyer, Rose, Boynton*

The altitude of this summit is *9,081* feet.

THOSE VISITING THIS POINT ARE INVITED TO REGISTER THEIR NAMES, ADDRESSES AND DATE OF ASCENT

It is particularly requested that nothing be written in this Register except the date and the names and addresses of those making the ascent. If there are features of your trip that are of general interest, The Sierra Club will be very glad to receive an account of the same by letter.

The Sierra Club has placed this Register at this point in order that you may record your ascent and in order that the Club may collect data regarding the number of people that make this climb and the locality from whence they come.

Penciled records are less apt to become illegible than ink. In case the pencil attached to this register has become lost, will you not kindly put one in its place.

Please show your appreciation of the purposes and efforts of The Sierra Club by using care in replacing this Register in the box, carefully securing the cover, and restoring the box to the spot from whence taken. Your assistance in preventing damage to or removal of this Register by any thoughtless or malicious person, will aid the Club in its efforts.

Any communication regarding this box or its contents, particularly if the Register is completely filled, will be appreciated by

THE SIERRA CLUB OF CALIFORNIA

To explore, enjoy and render accessible the mountain regions of the Pacific Coast, to publish authentic information concerning them; to enlist the support and co-operation of the people and the Government in preserving the forests and other natural features of the Sierra Nevada Mountains.

1931

Eldon Dryer placed the Sierra Club register with Warren Loose and Judd Boynton on July 4th 1931. They carried the aluminum metal box with them to the summit along with loose leaf register sheets and the title page we see above.

Two paragraphs of the title page are noteworthy:

“It is particularly requested that nothing be written in this Register except the date and names and addresses of those making the ascent. If there are features of your trip that are of general interest, The Sierra Club will be very glad to receive an account of the same by letter.

The Sierra Club has placed this Register at this point in order that you may record your ascent and in order that the Club may collect data regarding the number of people that make this climb and the locality from whence they come.”

In hindsight one might take exception to the request that users only put names and addresses in the register and refrain from making other comments. As you read the register, you will look forward to comments – and wish for more. Regarding uses of the collected data, nothing was associated with the register file from the Bancroft Library, and I never saw anything in Sierra Club publications through the years. Perhaps this book will fulfill that intended use.

The next page is the first entry written by Eldon Dryer about the time of the placement of the register box. Dryer wrote what he believed was the history of ascents of Mt. Starr King. As we know from earlier in this book (page 14), Dryer was incorrect in his historical statement. The first party to climb Mt Starr King consisted of George B. Bayley, Sidney V. Smith and Manuel Flores.

PLEASE IGNORE THE 1877 ANDERSON/HUTCHINGS ENTRIES

Dryer's comments about the history of early ascents of Mt. Starr King were incorrect. **The correct information about the first four ascents is on pages 14 and 15 of this book.** The ascent by Loose and Dyer could have been the fifth ascent of the peak, but it was probably the eighth. The first ascent is restated here:

George B. Bayley, Sidney Vanuxem Smith. and Manuel Flores were the first, ascending Mt. Starr King by the northeast side in August 1876, according to the historical record. Their route went up the left hand skyline of the dome where the trees reach the highest point as seen in the photograph on page 13.

⁶ Warren Loose's other ascents of Starr King: July 4, 1931, July 12, 1932

⁷ Dryer also ascended Starr King on July 4, 1931

Dryer mentioned the use of rubber soled shoes. One might think rubber soled shoes were an innovation that took place close to 1931 which made more frequent ascents of Mt. Starr King possible. However, rubber soled shoes were in the process of development as early as the late 1800's. As time went on the U.S. Rubber Company came up with a shoe they first called Peds, but due to trademark issues an alternative name of Keds was selected and mass-marketed as Sneakers in 1917. The shoes were called Sneakers because every other type of shoe made noise when one walked, except moccasins.⁸ If one wonders what type of shoes were in vogue for mountaineering before rubber soled boots, a common type of footwear for the mountains was leather soled and heeled boots which had hobnails protruding from the bottoms. These gave excellent traction in the forest and on snow, but on Yosemite rock were not effective.

Dryer's assertion that no one had been up the peak since 1877 generated a dispute. Richard Leonard, well known in the San Francisco Bay Area Sierra Club climbing circles, made this comment in the register referring to recent history:

6/28/32 ... I have heard of at least two climbs before 1931.

Boynton made a rebuttal to Leonard:

July 7, 1932 Judd Emery Boynton, 2800 Buena Vista Berkeley Calif

It is not true that this dome has been climbed prior to 1931 by anyone except the Anderson party. I have met several who have claimed to have climbed, but they never could answer questions put to them, and finally admitted they hadn't.

In answer to Boynton, Leonard gave these particulars a year later in their slow-motion argument:

June 10, 1933 ...Mr. Vandervort of Menlo Jr. College has been up twice around 1913 to 1916. Willard Grinnell of Berkeley claims an ascent around 1925.

⁸ <http://inventors.about.com/library/inventors/blshoe.htm>

We may conclude that ascents made before the register was placed would be in the order below based on the written record which includes Leonard's comments:

1. Bayley, Smith, Flores, August 1876
2. Bayley, Schuyler, June 25, 1877
3. Anderson, Hutchings, August 23, 1877
4. Anderson, Hutchings, Sweetland, Walker, August 23, 1877
5. and 6. Vandervort, 1913-1916
7. Grinnell, 1925
8. Loose, Dryer, 6/26/1931
9. Hopkins, 7/2/1931

Famed early Yosemite climbers Charles Michael and his wife Enid went up with a third party to climb Starr King in 1926. They were unsuccessful, but Enid wrote of the experience for the Stockton Record, and it is also included in *The Joy of Yosemite: Selected Writings of Enid Michael, Pioneer Ranger Naturalist* edited by Fernando Peñalosa⁹. The article is long and is not included in full here; however, a bit near the end of the article is included which buttresses Richard Leonard's assertion that Willard Grinnell ascended the peak in 1925:

A few days after our return home from Glacier Point, Charles met Willard Grinnell.

"Last year I went over and climbed Starr King," said Willard.

"It's hard to believe," said Charles, "which side did you go up?"

"The northwest side, it was easy. I had a girl with me. She slipped and that scared her and she refused to go farther. I ran up and down three times to show her how easy it was—there's nothing to it."

From this point forward, each register page will be displayed accompanied by the same information in type and with additional information, usually footnotes. My

⁹ Other books about Yosemite by Fernando Peñalosa include *Yosemite in the 1930's: a remembrance* and, *Shirley Sargent: Yosemite Historian*.

intent is to make the document easy to read, for one's eyes may tire from pages with faded handwriting in different styles.

¹¹ Dryer also ascended Starr King on June 25, 1931

¹² Warren Loose’s other ascents of Starr King: June 25, 1931, July 12, 1932

¹³ Emlen and Frost were naturalists in training at the Yosemite School of Field Natural History. Wilfred Frost was a San Francisco minister’s son.

¹⁴ Ennis Casselberry Woodruff (1896-1977) was an engineer (class of 1916 at UC Berkeley), working for PG&E and living in Manteca in the 1930s.

¹⁵ Peterson was a 30 year old medical student at U.C. Berkeley

¹⁶ Owen Williams, U.C. Student, was also on the first ascent of the El Capitan Chimney route with Ethel Mae Hill and Gordon Patten on October 9-10, 1937. Sierra Club Bulletin, February 1940, p. 54. Williams also climbed Starr King on July 3, 1936.

Who were Dryer, Boynton and Loose? The first recorded ascent of Half Dome outside of the cables was in 1931¹⁸ by Dryer and Boynton, so they were tested friction climbers. At this time Boynton was a college student in Ontario, California (Claremont Colleges are located there) as probably were Dryer and Loose by their addresses, and all three were likely Yosemite Park and Curry Company summer employees. How they were engaged to place the peak register is unknown.

Judd Boynton, 21 years old at the time of the ascent, came from an interesting family which was interviewed regarding his mother's dance activities for the oral history project at the Bancroft Library in Berkeley. The interview is fascinating reading for the student of history, dance and the Bohemians, but it does not touch on mountaineering.¹⁹ He had training in dance and was probably strong and had excellent balance. The address he wrote in the register is that of the "Temple of Wings", at that time the large Boynton family residence and location of his mother's dance studio. It was far up the Berkeley hills on the north side of the University of California campus and within a short distance of both Cragmont Rock and Indian Rock. The Temple had no doors and the family would sleep on mattresses which were gathered up and moved to the side so Judd's mother could teach dance there during the day.

Dryer was 18 at the time of the ascent. Later in life he owned patents and had a Malibu address, so he was probably a successful man. Warren Loose, 20, came from Mono County, California east of Yosemite National Park.

With the preliminaries over the race begins! Emlen and Frost climbed the dome in 45 minutes, Woodruff in 25 minutes, and then 15 minutes. As register entries go on, references to quickness of ascent will be found, not only of ascending the granite dome but also including the approach from either Yosemite Valley or the Glacier Point Road.

¹⁷ Charles A. Harwell

¹⁸ Sierra Club Bulletin, February 1940, p. 53

¹⁹ http://bancroft.berkeley.edu/ROHO/collections/subjectarea/artslit/music_dance.html

Woodruff climbed the summit dome by both routes within a couple of hours while leaving his partner waiting at the base of the northeast side. Woodruff used crepe soled shoes for friction climbing instead of Keds. Both shoes give good adherence to the rock for friction climbing. New crepe soles are slightly sticky. The dates on this page are scrambled, and the likely explanation is that a blank area was left on the page and later filled in.

Mt. Clark from Mt. Starr King

recorded so far in this book
to Frances Farquhar for
Sierra Club records.

Please report at Museum.
Yosemite the record of your
climb. Carl & I are on way
to Mt Clark will climb it
"por mañana". See the
red rock 1 mile N. of Clark on
Clark ridge? About 100, sediment
rock there. We are taking in
specimens of that rock.
Safe journey down!!

Carl Shannick - milk - Bert. H. 22
(turn over next blank page for)
panorama.

[Harwell and Sharsmith's 9/10/1931 entry continued]

[We will send ascents] recorded so far in this book to Francis Farquhar for Sierra Club records. Please Report at Museum, Yosemite for the record of your climb. Carl and I are on way to Mt. Clark will climb it "por mañana" [by tomorrow]. See the red rock one mile north of Clark on Clark ridge? About 10 acres sedimentary rock there. We are taking in specimens of that rock. Safe journey down!!

Carl Sharsmith – with – Bert H. (turn over next blank page for panorama)

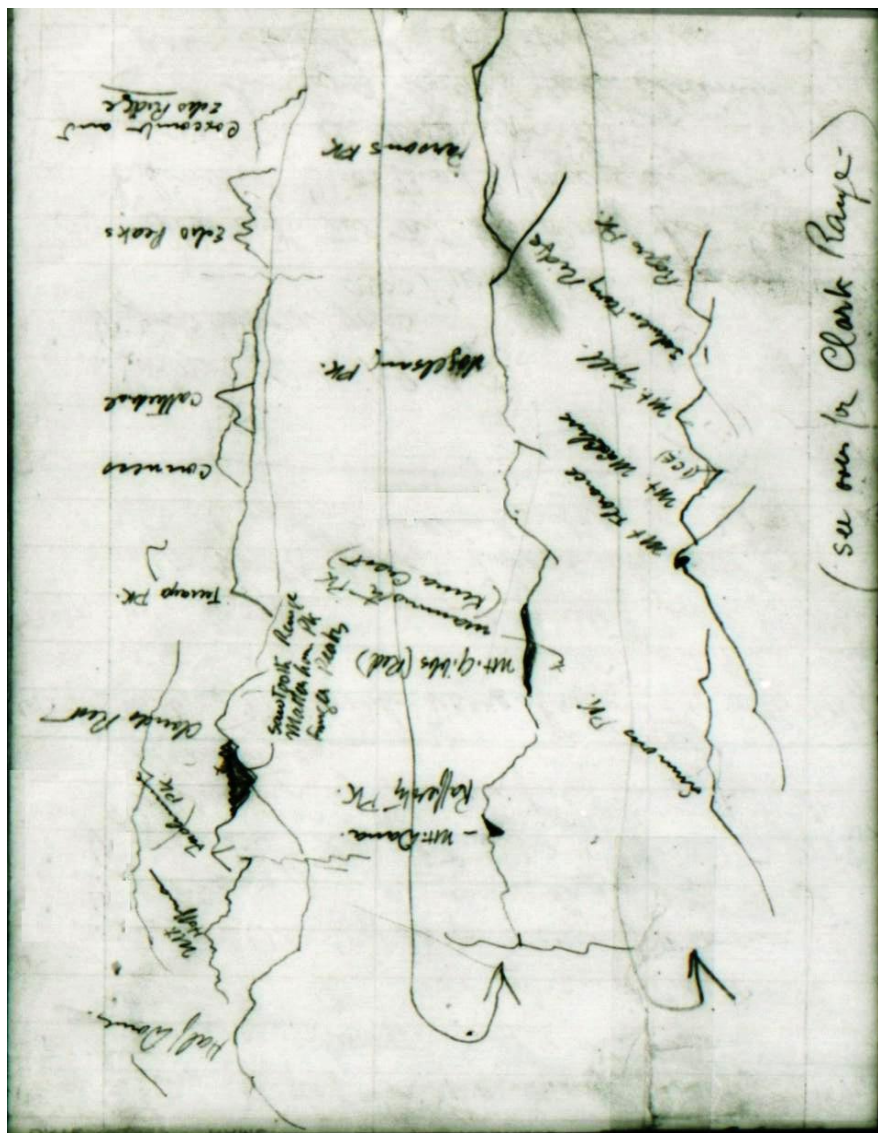

The National Park Service was formed in 1916, and Yosemite was part of its jurisdiction. Staff were assigned to investigate park features in order to interpret them for visitors. Harwell's entry indicates that wind, water and ice did not completely scrape the softer overlaying rock from the granite. A small patch of sedimentary rock remained on a granite ridge at 9,000 feet above sea level. This was geological documentation that the park area was once covered by sedimentary rock and therefore at a much lower elevation. The mountains were uplifted as a block and then glaciated to remove all but a trace of the original covering. In the 1960's we would learn plate tectonics caused the uplift.

Harwell became park naturalist in 1929. He resigned in 1940 to take a position with the Audubon Society. Sharsmith, a seasonal ranger, took time while on the summit to identify the surrounding peaks for later visitors by drawing panorama profiles to the north and east.

The summer of 1931 was Sharsmith's first year of employment while he attended school at U.C.L.A. Sharsmith graduated in 1933 and continued his education at Berkeley where he received his PhD.²⁰ Sharsmith's name appears in Richard Leonard's 1933 notes on members of the Sierra Club Rock Climbing Section in Berkeley.²¹ Sharsmith worked as a seasonal ranger for 25 years after graduation and later while employed as a professor at several universities during his career.

²⁰ Wikipedia is a good start for information about Carl Sharsmith

²¹ Yosemite Climbing Association at <http://yosemiteclimbing.org/>

Sharsmith's First Panorama. The order of peaks is as follows:

Top row - Half Dome, Mt. Hoffmann, Tuolumne Peak, **Sawtooth Range, Matterhorn Peak, Finger Peaks**, Clouds Rest, Tenaya Peak, Mt. Conness, Cathedral Peak, Echo Peaks, Coxcomb and Echo Ridge.

Middle row - : **Mt. Dana**, Rafferty Peak, **Mt. Gibbs (Red)**, **Mammoth Peak (Kuna Crest)**, Vogelsang Peak, Parsons Peak.

Bottom row – Simmons Peak, Mt. Florence, Mt. McClure, Mt. Lyell, sedimentary ridge, Rodger Peak.

The sedimentary ridge was the goal of the rangers. The bolded names refer to darkened areas on the drawing which are in the far distance.

Sharsmith's Second Panorama. The annotations for the Clark Range are, left to right, sedimentary ridge, Mt. Clark (see page 30), Gray Peak, Red Peak, Merced Peak. The sedimentary ridge is the location to which the rangers were headed.

On Anderson and Hutchings' ascent of the peak in 1877, Anderson used homemade moccasins which had been soaked in turpentine (paint thinner) to make them sticky and therefore better for friction climbing, that is, climbing where the rock is of relatively low angle but there are not many holds. Although an ingenious idea, the turpentine may have made the feet burn a bit. On June 22, 1932 (next page) Louis Petroff, tried another means of adhesion: Pine sap. One would imagine the stickiness would prevent falling or sliding down, but it may have made moving up difficult. As Petroff said, "Used sap (rosin) from yellow pine on hands and shoes to stick! It stuck!" Although Petroff says he is Bulgarian, he appears on the voting rolls in Los Angeles in 1928. Petroff's partner, Bob Swenson, went barefooted to get better traction on the granite. If one could control it, feet with slight perspiration would work best. These interesting techniques have been obviated by the climbing shoes and boots of today.

It is not true that this Dome has been climbed prior to 1931 by anyone except the Anderson party.				
I have met several who claimed to have climbed, but they never could answer the questions put to them, and finally admitted they hadn't.				

1932

6/22/1932 Louis Petroff, (Bulgaria) USC student Los Angeles Calif. Climbed together with the undersigned. Climbed from the north side. Used sap (rosin) from yellow pine on hands and shoes to stick! It stuck!

6/22/32 Bob Swenson, 1170 W Acacia St. Stockton, Calif. Climbed barefooted; member of the Kodiak Patrol²².

6/28/32 Richard M. Leonard²³ – Sierra Club – Berkeley Calif.

6/28/32 Robert D. Ray, Scout Naturalist, Berkeley Calif²⁴

6/28/32 H.B. Blanks²⁵, Scout Naturalist, CCC, Berkeley Calif

[Leonard writes] Up North face – I have heard of at least two climbs before 1931.

July 7, 1932 Judd Emery Boynton²⁶, 2800 Buena Vista Berkeley Calif. It is not true that this dome has been climbed prior to 1931 by anyone except the Anderson party. I have met several who have claimed to have climbed, but they never could answer questions put to them, and finally admitted they hadn't.

The initials CCC refer to the Cragmont Climbing Club, founded by Richard Leonard in March 1932 and named for the park in north Berkeley where many early Sierra Club rock climbers practiced. The climbers from Berkeley formed the vanguard for ascents in Yosemite at the time, and a number of climbers gave

²² Four Eagle Scouts of the Kodiak Patrol-Jack Dozier, 18; Bill Dozier,18; Thomas Mann, 18; and Bob Swenson, 17, all Eagle Scouts from Stockton, climbed Clyde Minaret from the east on Aug 2, 1933 the same day Walter Starr disappeared.

²³ Leonard's other ascent was on June 10, 1933

²⁴ The Ray family lived on Colusa Avenue in Berkeley, a short walk up Solano Avenue and the Indian Rock Path to the local climbing practice area at Indian Rock.

²⁵ Herbert Blanks was also on the first ascent of the West Face of the Lower Brother on 10/21/34 with Boynton Kaiser and Elliot Sawyer. Sierra Club Bulletin, February 1940, page 54. The trio also made the second ascent of the Higher Cathedral Spire.

Blanks lived within a quarter of a mile of Indian Rock Park in Berkeley.

²⁶ Boynton's other ascents: July 4, 1931, July 24, 1933, July 15, 1934, July 6, 1935

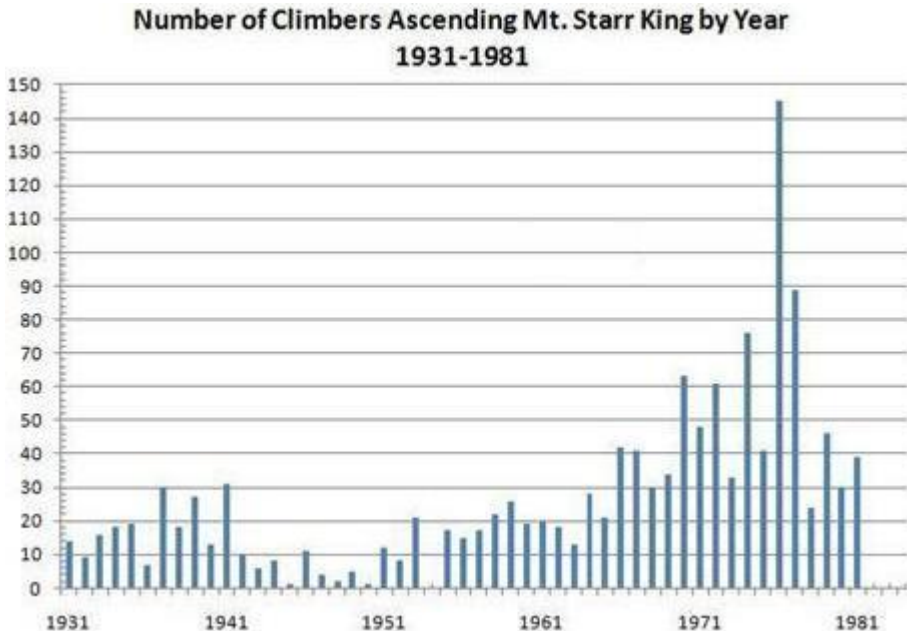

CCC as their affiliation. The same initials for the Depression era also commonly refer to the Civilian Conservation Corps, a job creation organization of the Federal Government. However, this organization was not formed until after Franklin Roosevelt became President in January 1933. All designations of CCC in the Mt. Starr King register appear to have been associated with the Cragmont Climbing Club, as the addresses of climbers putting CCC by their names are from cities on the east side of the San Francisco Bay.

The registers give us a chance to say something about climbers and climbing by compiling data from the entries. The first chart is of the number of people who ascended Mt. Starr King by year from 1931-1981. The data is graphed on the next page.

Year	Ascents	1948	2	1966	42
1931	14	1949	5	1967	41
1932	9	1950	1	1968	30
1933	16	1951	12	1969	34
1934	18	1952	8	1970	63
1935	19	1953	21	1971	48
1936	7	1954	0	1972	61
1937	30	1955	17	1973	33
1938	18	1956	15	1974	76
1939	27	1957	17	1975	41
1940	13	1958	22	1976	145
1941	31	1959	26	1977	90
1942	10	1960	19	1978	24
1943	6	1961	20	1979	46
1944	8	1962	18	1980	30
1945	1	1963	13	1981	39
1946	11	1964	28		
1947	4	1965	21		

The data seems to make little sense in some areas, and this is because social events, World War II, the Korean War, the environmental movement, the Bicentennial, the 100th year anniversary of the first ascent, the increasing popularity of rock climbing - each has had an influence. In a couple of years register pages were removed which cut the count of climbers. By how much remains a mystery.

The legendary drug plane crash at Lower Merced Pass Lake in the winter of 1976-77 led many climbers to hike the trail out of Yosemite Valley to Lower Merced Pass Lake. The trail goes by Mt. Starr King which I hypothesized might have led some of the climbers who salvaged dope from the Lockheed Loadstar to make a side trip. It does not appear to be the case as two Sierra Club groups added 34 people to the total for the year, and they were not up there for the weed.

The lowest years are centered on World War II and the Korean War years, and the highest year is the Bicentennial.

DATE	NAME	ADDRESS	CITY OR TOWN	STATE
July 1932	Jan S. Husted	1145 Wellington	Oakland	Cal.
	It's a good climb up that first stretch of granite slope but the panorama was worth the climb several times over.			
July 12/32	Miriam Baynton	2800 Buena Vista Way	Berkeley	Cal.
	A great climb and am glad I made it. More power to you.			
July 14/32	Warren Looze			
	Well here we are, blisters sunburn and all. Miss Baynton and Miss Husted ought to be proud of their achievement. Third and second women in 54 years respectively to gain the top of this rock pile.			
	Personally it looks the same as last summer to me.			
	We climbed north slope about 4 hours from 2 o'clock (granite) to 6 o'clock.			

July 7, 1932 Jean L. Husted²⁷, 1145 Wellington St. Oakland Calif. It's a good climb up that first stretch of granite slope but the panorama was worth the climb several times over.

July 12, 1932 Miriam Boynton,²⁸ 2800 Buena Vista Way Berkeley Calif. A great climb and am glad I made it. More power to you.

July 12, 1932 Warren Loose²⁹. Well here we are, blisters sunburn and all. Miss Boynton and Miss Husted ought to be proud of their achievement, third and second women in 54 years, respectively, to gain the top of this rock pile. Personally it looks the same as last summer to me. We climbed notch slope, about four hours from Valley (Yosemite).

²⁷ May be spelled Jeane in other documents. She also climbed Starr King on September 2, 1933.

²⁸ An older sister of Judd Boynton (July 4, 1931, July 7, 1932, July 24, 1933, July 15, 1934, July 6, 1935).

²⁹ Warren Loose's other ascents of Starr King: June 25, 1931, July 4, 1931

6/10/33 Oliver Kehrlein³⁴, Sierra Club, Am Alpine Club, Oakland Calif

[In Leonard's hand] Up the rock gully from the Illilouette side (South) to the notch at the base of Capt. Anderson's route. An easy climb up this route to the summit. We will go down the north face, towards the Valley, thus making the traverse.

Mr. Vandervort of Menlo Jr. College has been up twice around 1913 to 1916. Willard Grinnell of Berkeley claims an ascent around 1925.
Sierra Club

Richard Leonard and Bestor Robinson are on this climb together. In 1934 they would join Jules Eichorn for the first ascent of the Cathedral Spires, milestones in Yosemite rock climbing. Robinson was also with Brower on the first ascent of Shiprock in New Mexico.

In a rare bit of luck, Michael Rettie found old photographs made by Lewis F. Clark at a garage sale in Alameda,³⁵ and Michael graciously gave permission for them to be used here. First, Lewis F. Clark at home in Alameda, a desperate looking character who one day would be the President of the Sierra Club. He has a bandana and a Sierra Club cup on his belt, and he is holding a day pack.

³⁰ Leonard's other ascent was on June 28, 1932

³¹ Bestor Robinson had a distinguished life both in the mountains and out. Wikipedia has an article on him.

³² American Alpine Club, a national organization dedicated to mountaineering.

³³ Clark also ascended the peak on May 29, 1934.

³⁴ Kehrlein was honored by the Sierra Club for his work in organizing outings by having an award named for him, the [Oliver Kehrlein Award for Outings Leadership](#)

³⁵ The story is on [Supertopo.com](#)

Sept 2, 1933 Kenneth May CCC Party from annual Berkeley outing of Rock
Climbing Section of the Sierra Club. Nord Face.
Elliot Sawyer⁴⁰ CCC, Berkeley (Party of 6/10/33 descended as stated).
Jean L. Husted⁴¹ CCC U.C. Oakland Cal

We see Boynton (July 24, 1933) is making multiple ascents, up to his third, and Jean Husted is on her second, although not so annotated. The September 2, 1933 entry by Jean Husted giving “CCC” as her affiliation is the last “CCC” to be seen in the register. In 1975 Leonard stated that the CCC was disbanded in 1932 and merged with the Sierra Club Rock Climbing Section (SCRCS) ⁴², but he was off by a year based on both Husted’s entry and his own of June 10, 1933.

The next register page is difficult to read, but it is one of the best entries written. It is of a young man roaming about on his own and climbing a route isolated from any possible help in the event of an accident and doing so in questionable footwear. But he had a guardian angel...

³⁶ Boynton’s other ascents: July 4, 1931, July 7, 1932, July 15, 1934, July 6, 1935

³⁷ The University of California at Berkeley is often abbreviated U of C or U.C.

³⁸ Wright also ascended Starr King on July 15, 1934, Jul 20, 1937, June 25, 1955, October 13, 1956, June 1, 1957, June 21, 1958 and June 25, 1960.

³⁹ McCharles lived about a mile south of Cragmont Park in Berkeley. His other ascents of Starr King: June 11, 1934, July 15, 1934, July 1, 1935, July 6, 1935, August 17, 1935, June 30, 1936, July 20, 1937, July 23, 1937, June 25, 1955.

⁴⁰ Sawyer was also on the first ascent of the West Face of the Lower Brother on 10/21/34 with Boynton Kaiser and H.B. Blanks. Sierra Club Bulletin, February 1940, page 54. The trio also made the second ascent of the Higher Cathedral Spire.

⁴¹ Husted’s other Starr King ascent was on July 7, 1932.

	opened a hillside all along the rim from the top of the hill			
	to the bottom of the hill. I don't know, I don't know			
	It would have been the white peak. Happy Landings.			
	Carl Reichsfeldy			

9/3/33 Carl J. Richofsky U.S.B.P.R. 321 South 7th St Richmond Calif

Evelyn Howard my precious guardian angel was with me in spirit. My time [on the dome] was around 35 minutes. I took that ledge slab around to the north and was I blue. I almost lost my nerve as I slipped and slid approximately twenty feet, not fast but was my face red. I marked my route in blue heel. This summer in May I did Half Dome and was it raining but the top it was like dear old S.F. fog. I came down a canyon that can be seen from here. Just to the left of the Dome on the left. Very steep at times. I climbed onto trees to get down. Came out near Vernal Falls on the North side. I used Tennis shoes to climb this. They were borrowed from Brad Claussen, Eagle Rock, Calif (Stanford). He wears tens and I fives so one shoe would of been enough. Try Mt. Talbot or Mt Rose at Tahoe. Write to me please. I tried Half Dome, Ledge Trail, El Capitan, Eagle Peak, Yosemite Falls, North Dome, Basket Dome, Sentinel Dome, Vernal, Illilouette, Nevada Falls. All along the rim from the top of Bridalveil Falls to Sentinel Dome. It's very windy at times. I thought it would blow me off the granite face. Happy Landing. Carl Richofsky. U.S.B.P.R.

U.S.B.P.R. stands for the United States Bureau of Public Roads, a forerunner of the Federal Highway Administration. In 1931 the U.S.B.P.R. had a camp at 7,000 feet on Bridalveil Creek in Yosemite National Park to make a survey for a modern paved road to Glacier Point.⁴³ The camp was a small affair consisting of five tents, two for living, one for office work, and two for the mess facilities, dining, cooking and storage. The improvement of roads and facilities was high on the list of activities for the Park Superintendent, Charles Goff Thomson.

The public record shows that Carl J. Richofsky was born in 1907. Carl R. Richofsky was born December 15, 1938, and his mother's maiden name was given as Howard.

DATE	NAME	ADDRESS	CITY OR TOWN	STATE
Sept. 15, 1933	Roland Heath	1245 Oak St.	San Francisco	Calif
"	Paul Sikora	3510-18 th St.	San Francisco	Calif
"	Victor Laques	3339 Solom St.	San Francisco	Calif

The above party of 3 have completed a 2 weeks
 knapsacking trip thru the south section of the
 Park. Including Buck Camp, Royal Arch Lake,
 Ostrander Lake, Glacier Pt., via Merced trail
 to Ottaway creek, to Bruze Lake, via
 Fernandys Pass to Isberg Lake. ~~from Solom~~
~~lake~~ ^{by Post Pk} to top of Half Dome in one day by
 way of the Washburn Lake and Merced
 lake. Carried a knapsack load of Red Fir
 bark to top of Half Dome that night and
 had a fire fall of our own. With me to this
 is fair fall push over man at Glacier Pt.
 In making our ascend of Starr King we
 came up the South East slope probably the
 one used by Capt Anderson but we did
 not know it at the time. The climb was
 not so bad as one makes it sound although
 one must use strategy. We used the ordinary
 Rubber composition soled shoes with exceptional
 results. Now to go down by the North
 slope. Oh for Jimmie Durante now.

The Firefall, a Yosemite tradition started in 1872 and ended in 1968, consisted of burning embers being pushed off Glacier Point. In the following entry the climbers mention that they made a special Firefall from Half Dome before coming over to scale Mt. Starr King.

9/15/1933 Roland Heath, 1245 Oak St San Francisco Calif

Paul Sikora, 3510 18th St San Francisco Calif

Victor Sagues, 339 Folsom St San Francisco Calif

The above party of 3 have completed a 2 weeks knapsacking trip thru the south section of the park. Including Buck Camp, Royal Arch Lake, Ostrander Lake, Glacier Point, via Merced Trail to Ottaway Creek, to Breeze Lake via Fernandez Pass to Isberg Lake by Post Peak Pass, from Isberg Lake to top of Half Dome in one day by way of the Washburn Lake and Merced Lake. Carried a knapsack load of Red Fir back to top of Half Dome that night and had a firefall of our own. Witness to this is fire fall push over man at Glacier Pt. In making our ascent of Starr King we came up the South East slope probably the one used by Capt. Anderson but we did not know it at the time. The climb was not as bad as one makes it sound although one must use strategy. We used the ordinary rubber composition sole shoes with exceptional results. Now to go down by the north slope. Oh for Jimmie Durante's nose.⁴⁴

⁴⁴ Jimmie Durante was a comedian who was known for his prominent nose. Why one would be wishing for this at the moment is an interesting question.

PLEASE DO NOT USE MORE SPACE NECESSARY

⁵⁰ Type mapping refers to determining the vegetative cover of an area.

⁵¹ Standard Oil (Chevron) gas station in Yosemite Valley.

⁵² The names for this entry, "Yes", are on the following page in the register.

⁵³ A sometimes American naming tradition is to make a child's first name the maternal family surname and the last name that of the paternal family surname. Some come out well, but others lead to possible confusion. Lane also climbed Starr King on July 5, 1935.

⁵⁴ His other ascents of Starr King: July 24, 1933, June 11, 1934, July 15, 1934, August 17, 1935, June 30, 1936, July 20, 1937, July 23, 1937, June 25, 1955.

⁵⁵ This entry is duplicated on the next page of the register because the signers realized they were out of date order. The dates present an interesting problem.

⁵⁶ See 7/1/1935 on this page.

⁵⁷ Boynton's other ascents: July 4, 1931, July 7, 1932, July 24, 1933, July 15, 1934

Robert B. Sanders⁶¹ Stanford and Pasadena Calif

Up south and down north routes.

David Brower makes his first appearance in the register on August 11, 1935. Brower would become the first salaried Executive Director of the Sierra Club and be involved in conservation and climbing activities, including writing and editing climbing guides. Brower's autobiography *For Earth's Sake: The Life and Times of David Brower* is must reading. Brower and Leonard wrote the first *Climber's Guide to the High Sierra*, including a section on Yosemite Valley in the February 1940 Sierra Club Bulletin. Mt. Starr King was included and the two original routes were described.

⁵⁸ Duplicate entry – see prior register page.

⁵⁹ Lane also climbed Starr King on July 1, 1935.

⁶⁰ Brower's other ascents: August 18, 1935, March 9, 1937, July 27, 1937

⁶¹ Other ascents of Starr King on August 18, 1935 and August 16, 1936.

REGISTER REMOVED

5/29/37

By Committee on Mountain Records – Sierra Club

BOOK TYPE REGISTER PLACED

5/29/37

(The committee on Mountain Records was revived 6/10/33 by the discussion
herein of the records on this peak. Richard M. Leonard)⁷³

William Kat was a carpenter who went to work on building the Ahwahnee Hotel
in 1927. He fell in love with Yosemite and stayed on in building maintenance
with the Yosemite Park and Curry Company until 1946 when he retired. These
are his first recorded entries at age 61, but he may have had earlier ascents. He
said he climbed Mt. Starr King 19 times.

⁶⁹ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936,
August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939,
July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940,
May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

⁷⁰ Ibid

⁷¹ Other ascents of Starr King on August 11, 1935 and August 18, 1935.

⁷² The Latin reference is the motto of the Order of the Garter which is translated as
"Evil be to him that evil thinks". In this context it could mean "if you think this ascent
is of little consequence, so are you". Sanders was almost 22 at this time.

⁷³ This statement refers to the discussion Leonard and Boynton had about the history
of who had climbed the peak.

Please don't rip out pages containing famous climber's names.
Nelson and Salathè are gone.

1937

Two members of the climbing party placing the register, Dawson⁷⁴ and Allen⁷⁵, later had rock climbing first ascents in Yosemite Valley. Ruge lived on Cragmont Avenue in Berkeley in 1935 and was an active Sierra Club mountaineer. He was on the first ascent of an un-named peak in 1934 that was subsequently named Mt. Ansel Adams.

The 1973 note indicates that pages containing the records of the ascents of John Salathè and Anton Nelson, famous names to be sure, had gone missing, and of course other names disappeared from the register, too. No entries from 1950 and 1954 are in the register, and either year may be the time period covered by the missing pages. Based on the handwriting and the year, 1973, the author of this note was probably Chris Denney⁷⁶ who made nine ascents of the peak in this register.

⁷⁴ First ascent of Split Pinnacle, Sierra Club Bulletin, February 1940, p. 59

⁷⁵ First ascent of Kat Pinnacle in 1940 (named for William Kat whose name we see in these registers). A Climber's Guide to Yosemite Valley, Steve Roper, 1964, p. 36

⁷⁶ Denny made an ascent of Starr King on July 21, 1973.

Kenneth Adam and W. Kenneth Davis, both Bay Area rock climbers, were on the first ascent of the Royal Arches route with Morgan Harris in 1936, a classic climb in Yosemite Valley.⁷⁸

Bob Brinton and Bill Rice were a pair of Southern California rock climbers who developed their skills at Tahquitz Rock near Idyllwild, then came north to Yosemite to climb. Both Brinton and Rice had first ascents at Tahquitz in 1936, Brinton on the Piton Pooper and Fingertip Traverse, Rice on Angel's Fright and the Fingertip Traverse (with Brinton and two others)⁷⁹.

 Carl P. Jensen SC RCS
 Thomas L. Johnston CCHC

The August 22nd entry with William Kat and Harris F. Shaw continues on the next register page to include Carl P. Jensen and Thomas L. Johnston, so they are shown above to keep the party intact. The annotation by Johnston's name is CCHC which stands for the Camp Curry Hiking Club, an ad hoc summer organization. In all likelihood Shaw and Jensen were also summer employees of the Yosemite Park and Curry Company. Carl Jensen became a talented climber who was on the first ascent of Jensen's Jaunt⁸⁵ at Tahquitz Rock in 1938 as well as that of Pulpit Rock⁸⁶ in Yosemite Valley in 1939.

⁸⁰ His other ascents of Starr King: July 24, 1933, June 11, 1934, July 15, 1934, July 1, 1935, July 6, 1935, August 17, 1935, June 30, 1936, July 23, 1937, June 25, 1955.

⁸¹ Wright also ascended Starr King on July 24, 1933, July 15, 1934, June 25, 1955, October 13, 1956, June 1, 1957, June 21, 1958 and June 25, 1960.

⁸² His other ascents of Starr King: July 24, 1933, June 11, 1934, July 15, 1934, July 1, 1935, July 6, 1935, August 17, 1935, June 30, 1936, July 20, 1937, June 25, 1955.

⁸³ The meaning of the abbreviation D.P.O. is unclear.

⁸⁴ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

On August 29th William Kat accompanied Jules Fritsch up the peak. Fritsch was a Swiss-German hired in 1928 by the Yosemite Park and Curry Company as part of their development of cross country ski touring and ski mountaineering in the park⁹⁰, well before the official opening of Badger Pass in January 1936 and the general shift to downhill skiing. The first ski hut was a cabin on the west side of Mt. Watkins. Mary Curry Tresidder recalled, "Plans for Snow Creek Cabin were drawn by Eldridge T. Spencer, with Dr. Tresidder poring over them and making suggestions. We had a book of pictures and plans of Swiss mountain huts, I remember, which we referred to. Bill Kat did a good deal of the work on the cabin, and Dick Michaelis, later the caretaker there, and Jules Fritsch, the little Swiss ski instructor, also worked on it."⁹¹ Kat also worked on the ski facilities in the Badger Pass area. He spoke German fluently, as well as his native Dutch, so he and Fritsch were a good fit. Fritsch, the subject of a well known Ansel Adams photograph, was caught skiing down Lembert Dome in Yosemite making a single, swooping track on an otherwise unbroken snow slope. Fritsch did serious ski

⁸⁷ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

⁸⁸ George Hudson also climbed Starr King on July 28, 1939, July 19, 1940

⁸⁹ Fred Hudson also climbed Starr King on July 28, 1939, June 11, 1941, August 24, 1947

⁹⁰ Yosemite's Innkeepers by Shirley Sargent, p.109

⁹¹ Yosemite Nature Notes, Volume XXXII, Number 2, February 1953

mountaineering and winter ascents of Sierra peaks. Kat used snowshoes for his winter outings.

If one wants to avoid the crowds, what are the best months to ascend Mt. Starr King? The register has dates for most ascents which include the month, or allow one to deduce it:

Month	Climbs
Jan	69
Feb	9
Mar	35
Apr	48
May	154
Jun	268
Jul	309
Aug	184
Sep	106
Oct	146
Nov	20
Dec	13
Unknown	3

The month of January 1976 had 56 ascents. A group outing from Westmont College was the cause of this anomaly. Absent this, the total for all January's would have been 13, and the best months to avoid the crowds would have been November through February. The register entries do not say if the reason for the outing in January 1976 was the Bicentennial, or the celebration of the 100th anniversary of the first ascent of the peak by George Blake Bayley, Sidney Vanuxem Smith and Manuel Flores, or mere happenstance. The chances of meeting anyone on Mt. Starr King in January are slim.

Climbs of Mt. Starr King by Month

The month of October stands out as a seeming anomaly, but October is one of the truly glorious months for climbing in Yosemite, even with its shorter days.

July 10, 1938.

Alfred Kubo, Interlaken Switzerland, VENI VIDI VICI!!!!⁹⁴

08/03/1939 Have had a hard time getting those four boys up but made it and got down again OK. Wm Kat⁹⁵

Although the page ends with Alexis Byrne's entry, the rest of the party and a later comment by William Kat from the next page are included for the sake of continuity. The note by Kat was dated a year later and written when he was, apparently, on the peak alone. Kat often took a few others with no experience up the peak, and, as the writings of the four young men above show, it was a thrill. Kat, 63 on this ascent, greatly enjoyed the company of the young summer employees in Yosemite. A photograph of Kat and the four young men of the July 21, 1938 ascent is on the following page. The photo also shows that the "big carien" built by Judd Boynton and partners on July 5, 1935 is still there. The page after the group photo has an enlargement to show the detail of the register box.

⁹² Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

⁹³ Emanuel's other ascent of Starr King was on September 3, 1938

Nice climb - Nice view

July 27, 1937⁹⁶ Ascent by SE ridge – 4 hours from Glacier Point
Morgan Harris⁹⁷ – SC RCS
Dave Brower⁹⁸ – SC RCS
Joe Brower SC RCS⁹⁹
Jeane Barnbrock – U.C.L.A.

August 10, 1938 Dr. C.R. Wylie Jr.,¹⁰⁰ Ohio State University. Came up alone via SE Saddle. Nice climb - nice view.

Morgan Harris had fourteen rock climbing first ascents in Yosemite Valley. Surely his greatest accomplishment was the first ascent of the Royal Arches route, a climb for which he was the driving force.

C.R. Wylie was a mathematician and poet. You never know who will show up climbing solo on Mt. Starr King! Aside from his poetry, his books also include 101 Puzzles in Thought and Logic, Advanced Engineering Mathematics, Foundations of Geometry, and Introduction to Projective Geometry. His poem “Paradox” is quite good. Wylie neatly boxed in his entry, something only one other person did in the registers. Is this a turn of the mathematician’s mind?

⁹⁶ The year may be in error as the month and day appear in correct order with the preceding and following entries.

⁹⁷ Harris’ other Starr King ascent was on May 21, 1957

⁹⁸ Dave Brower’s other ascents: August 11, 1935, August 18, 1935, March 9, 1937

⁹⁹ Dave Brower’s younger brother. Dates of his other ascents: June 29, 1939, August 4, 1940, July 10, 1941

¹⁰⁰ Clarence R. Wylie. His books are still available on the secondary market.

The comment by Pellegriso on September 3rd, “makes Glacier baby’s stuff” refers to hiking (or scrambling) the Ledge Trail to Glacier Point from behind Camp Curry. The trail has long been closed. It was difficult to maintain and a number of accidents took place on it, including fatalities.

Regarding the May 29, 1939 entry, Richard Leonard wrote an article in the February 1940 Sierra Club Bulletin about rock climbing by 37 club members in Yosemite where on page 118 he said,

¹⁰¹ Emanuel’s other ascent of Starr King was on July 21, 1938

¹⁰² Kat’s recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

¹⁰³ Also climbed the peak on October 29, 1942

¹⁰⁴ Dyer also ascended Starr King on May 31, 1941

Mt. Starr King. – On May 28, under the generous leadership of Dorothy Markwad and John Dyer, ten members of the trip were able to enjoy the extensive view from this formerly “inaccessible” summit.

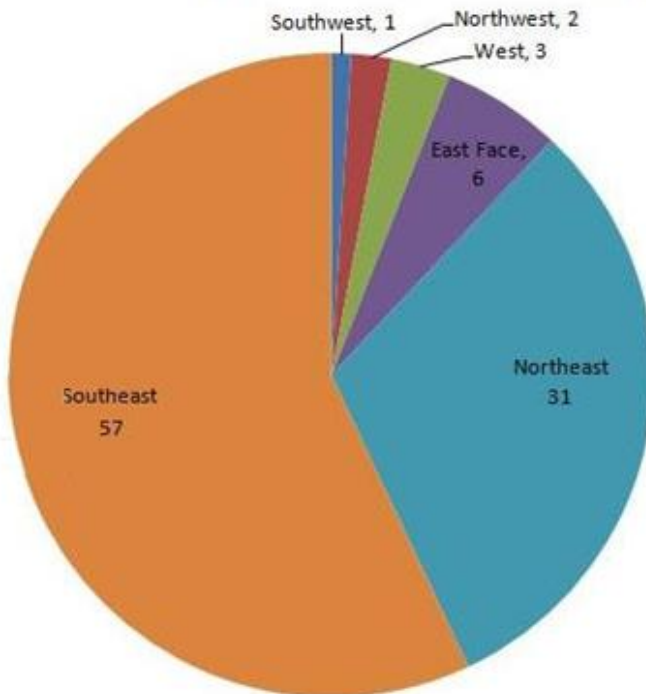

Mount Clark. – Many enjoy general mountaineering and wilder and higher country rather than pure rock climbing in the valley. Thus on a four day trip Lester Ferris, Ben Hall, Stephen Hall and Tom Morley ascended Mt. Clark from Washburn Lake , and also reached the summit of Mount Starr King on their return.

Leonard’s article is partly corroborated by the register in the May 29, 1939 entry, although one of the two is off by a day. However, the names of Lester Ferris, Ben Hall, Stephen Hall and Tom Morley are nowhere in the register. This raises a question about the integrity of the climbers, the integrity of the register or Leonard’s understanding of what happened as it was reported to him. Of course there is no answer, but it may be as simple as the climbers not signing the book.

The route used by climbers is sometimes mentioned in register entries. The two original routes were the NE (George Blake Bayley, Sidney Vanuxem Smith and Manuel Flores’ first ascent route from 1876) and the SE (George Anderson’s route from 1877). Other routes were put up later, but the two original were the most popular. For climbs where the route name was given, these are the percents:

Route	% Climbs
Southwest	1
Northwest	2
West	3
East Face	6
Northeast (Bayley, Smith and Flores 1876)	31
Southeast (Anderson 1877)	57
	100

% Climbs by Route on Mt. Starr King

Anderson's route has the advantage of being warm and dry more than Bayley, Smith and Flores'. However, for some winter ascents climbers found they could virtually walk up the snow to the summit on Bayley, Smith and Flores' route. The other routes are rock climber's routes, and information about them should be sought from a guide book such as *Southern Yosemite Rock Climbs* by Mark and Shirley Spencer.¹⁰⁵

¹⁰⁵ Mark Spencer has had nine ascents of Mt. Starr King, one in the period covered by this book on July 13, 1980.

George R. Hudson¹¹⁷ U.C.L.A., 2519 Lyric St LA

In 1966 William Kat wrote the following about his trip up Mt. Starr King with
Elliott and Wetzler on August 13, 1939:

Herbert Wetzler, a lanky six-foot four inch Texan, a student of a
southern college, and a summer clerk at the accounting office of the
Curry Company in Yosemite Valley, was full of fun and had a great
hankering to do some mountain climbing. But he wouldn't dare to climb
by himself, so he asked me if he could go along with me which suited me
fine. The next Sunday we two and another summer helper, Ralph Elliott,

¹¹³ Russell also climbed Starr King on May 30, 1941 with her sister, Elizabeth Lewis. Phoebe Russell and Elizabeth Lewis were the cousins of Ruth Dyar Mendenhall, an early climber of note in southern California. The two ladies joined the Sierra Club in 1938. Ruth married John Mendenhall and they climbed peaks and technical rock climbs at Tahquitz. See "Woman on the Rocks, the Mountaineering Letters of Ruth Dyar Mendenhall".

¹¹⁴ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

¹¹⁵ Elliott's other ascent of Starr King was on July 26, 1940

¹¹⁶ See note 78

¹¹⁷ George Hudson also climbed Starr King on July 7, 1938 and July 28, 1939

drove to Glacier Point and with our rucksacks, climbing rope, water and food, started the trail which led us to a canyon where we crossed the Illilouette Creek and proceeded to the Anderson route at the southeast saddle of Mt. Starr King. This was really a nice climb over boulders and slick slopes where a little friction climbing was a revelation to Herb, who, laying flat on his belly crawled like a huge lizard. We made the saddle in fair time but now the actual climb started. I showed the boys how to handle the ropes and gave a few little instructions on how to behave if one should slip or should get in distress.

I started the first steep smooth wall and went up to where there was a place to stand. Of course we were all three roped together and I made my first belay station without difficulty. Next there was about eight feet of the smoothest rock so I crawled and, reaching out, caught a little unevenness to help pull myself up and I was then able to reach a rock where I could belay to help the boys up to where I was with room enough for all. The boys did all they could to climb the cliff, but wound up climbing the rope that I held secure around a protruding upright rock. Then came the real test for we had to traverse a two-inch wide line of rock, harder than the granite rock of the dome. Here a slip would be fatal, for the steep, smooth slope went down hundreds of feet. I went ahead and walked the line (the proper name is dike). The dike runs horizontal about thirty feet where there is a good place to belay. After I and the rope were secured the boys followed but were really scared. However, I had spanned a half-inch rope from the upright rock to where I was and so made a handrail. All got safely to the next station. Now it was going up again very steep, but, by laying on the right side with footrests and handgrips on the sinuous edge of an overlaying shell, we all got up nicely.

Herb declared, —I've never felt happier in my life.

We now came to a niche where there was room for six. We rested there after the last strenuous climb and then crossed a soft, wide, slick slope by friction climbing. We were now under a huge overhanging slab, which had cracked off from the mountain and gave us a chance to climb out in the open sunshine. The rest was easy going and on the top we signed our names on a hidden climbers' registration book. I asked the boys how they liked being on top of Starr King where hardly anyone ever comes. They were as happy as kids can be.

After scanning over the horizon, pointing out the various peaks, we spotted a niche where the careful Mr. Anderson had piled a small supply of firewood sticks in the year of 1877 - two years after the year I was born.

We went down exactly the way we came up with only one difference. Going up I had the lead, going down I was the last to belay for the boys' safety.

Following this adventure Kat and Wetzler went on another to White Mountain just south of Mt. Conness where Wetzler accidentally knocked a rock down a chimney which hit Kat and cause him to fall a good distance. He broke his neck, had a fracture at the base of the skull and other points, broke his shoulder and foot. He was not expected to live but he pulled out of it. In fact, he was back to work within two months, and he climbed Mt. Starr King twice the following summer.

I still don't believe it. Phil Arnot July '62

The climb by Kat on September 1, 1940 included three others who comprised a group of residents. Cramer was the Vice President for Finance and Treasurer of the Yosemite Park and Curry Company.¹²⁵ Normally people high in the company kept away from mountaineering at this time, but Cramer had his office in the Ahwahnee and Kat had his workshop there and they had a friendship. Jules Fritsch we have met before, the little ski instructor from Switzerland. Don Buchanan was a prodigious hiker and scrambler who made more than 20 ascents of Half Dome by going directly up from Mirror Lake to catch the cable route.¹²⁶

¹²² Also ascended Starr King on August 8, 1943.

¹²³ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

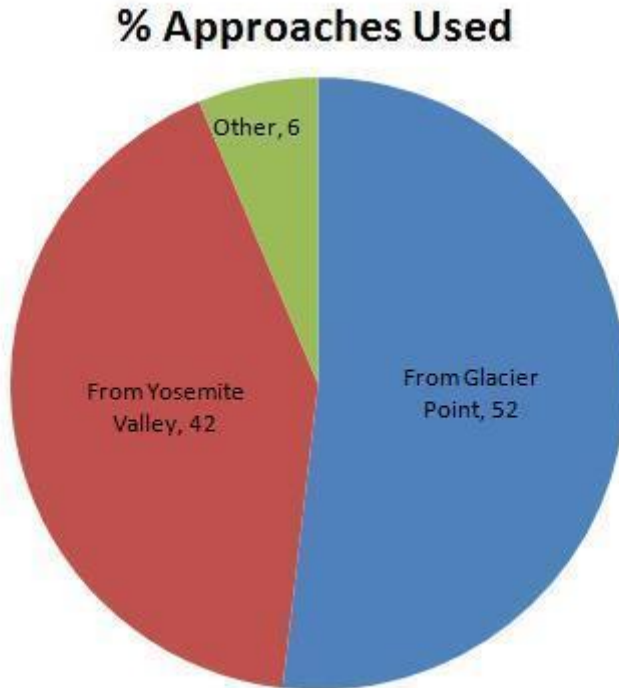

¹²⁴ Olson also climbed Starr King on June 26, 1941

¹²⁵ Yosemite's Innkeepers by Shirley Sargent, p.114

¹²⁶ Sierra Club Bulletin, February 1940, p. 51

Although the Olson's time on September 1st was hard to believe for Phil Arnot, Olson's times were reasonable for someone in excellent physical condition. He probably slept well after his evening shift.

Climbers of Mt. Starr King sometimes noted which approach they used to get to the base of the granite domes. The easiest approach is probably from the Glacier Point Road, although in some seasons it may be hard to cross Illilouette Creek. The other popular approach is from Yosemite Valley. A small number of climbers end up at Mt. Starr King by coming down from the higher country, sometimes from Mt. Clark.

Back down? The spikes are in the wrong way. Ellen B. at base. Not enuf rope for 3, & too short to get her.

Aug 8 1943 Stewart Cramer, Yosemite California born in Cleveland Ohio age 12
Margaret Wilson, Yosemite Nat'l Park California Sunday. I wore out my
pants coming up
Wm Kat¹⁴⁸, Yosemite 17th trip to here
Sterling S. Cramer¹⁴⁹, Yosemite

I was fortunate to contact two people who went up Mt. Starr King with William Kat. One was Stewart Cramer. Here is the text of a letter he wrote in February 2009 in reply to my questions:

I am the Stewart Cramer age 12 who climbed Mt. Starr King in 1943 with your grandfather, and that is my name as it was then in the log at the summit. My father's name appears below your grandfather's name.
Here are the answers to your questions:

[What route did you take up Mt. Starr King?]

1. We left the Glacier Point road and crossed Illilouette Valley to begin our climb.

[What do you remember about the climb?]

2. I remember much friction climbing near the top. Your grandfather was quite adept at friction climbing.

[Do you have any other recollections of William Kat?]

3. He had his own way of doing things – a “local character.” About three years before, your grandfather and my father and I climbed the Gunsight-Bridalveil Notch. Possibly a summer later (1942), I was climbing the talus in the lower ½ mile of Indian Canyon (Humo was

¹⁴⁸ Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

¹⁴⁹ Also ascended Starr King on September 1, 1940.

the original name of canyon and creek) and on the way back to the Valley floor, where the creek banks are mostly loose dirt and gravel, I saw a coat folded up, and a hat placed upon it – sort of Tyrolian, and I recognized the hat as what I would see your grandfather wearing, so often. Something told me to leave it in place. When I got home I told my parents what I had seen on the bank of the canyon. My father made a phone call and right away learned your grandfather had just arrived at the hospital that morning. He had a broken leg. Probably, as I was returning home, a hospital maintenance man had walked back up the canyon and retrieved his hat and coat. I don't know any details about how your grandfather got down from the canyon, or why his hat and coat were left behind.

The reference to the broken leg gives the reason for no climbs up Mt. Starr King in 1942 by William Kat.

The “Lovers Leap” drawing was on one of the last two pages of the book. I moved the drawing to be near Stewart Cramer’s entry. Perhaps drawn surreptitiously at the time of his ascent, it is a 12 year old boy’s art work. The name “Tony” and “?” may have been added later in a different hand.

Wm Kat¹⁵², Yosemite (70). 18th trip up here. This is my farewell trip to Starr King

7/16/1944 Kenneth Wells, Richmond CA 1st trip, left 6AM arrived 1PM

James D. Lanella, 17 yr old, Burbank Calif. 1st trip but it won't be the last

In October 2008 Paul de Pfyffer wrote the following about his ascent in 1944:

We went from the valley up the mist trail to the top of Nevada falls then up to Mt. Starr King. Mr. Kat led my father and I up the mountain. As I remember, Mr. Kat knew the way very well and we had no trouble in climbing Mt. Starr King.

My parents lived in the valley. I don't really remember much of the climb except a few places were a little scary to me; also Mr. Kat thought that I was the youngest climber to climb Mt. Starr King at that time.

Paul's father, Ralph de Pfyffer, was one of the Swiss ski instructors hired by the Yosemite Park and Curry Company around 1928. By this time he was in charge of the photo lab for the Curry Company where he would remain.

¹⁵⁰ See also May 29, 1937 and May 21, 1957

¹⁵¹ Also climbed the peak on July 13, 1942

¹⁵² Kat's recorded ascents of Starr King were on August 9, 1936, August 16, 1936, August 22, 1937, August 29, 1937, July 21, 1938, September 3, 1938, July 14, 1939, July 29, 1939, August 3, 1939, August 13, 1939, July 26, 1940, September 1, 1940, May 30, 1941, July 10, 1941, August 8, 1943, July 16, 1944.

William Kat shows his age as 70, but he was 69 years of age. He had a habit of counting the day he was born as his first birthday. He also says it is his farewell trip, and it is the last register entry for him. In 1960 he was clear that he had climbed the peak 19 times. The register only has 16 entries for him, so he may have made climbs and not signed in. However, for our purposes here, the register is the controlling document.

The vast majority of climbers reached the summit of Mt. Starr King once, others several times. In all we saw 1364 ascents in the registers made by 1146 different people. The following table tells the tale:

Ascents per Climber	Number of Climbers	Number of Ascents
1	1018	1018
2	91	182
3	20	60
4	8	32
5	3	15
6	1	6
7	0	0
8	2	16
9	1	9
10	1	10
11	0	0
12	0	0
13	0	0
14	0	0
15	0	0
16	1	16
Totals	1146	1364

The number of people who made multiple ascents, 128 (in bold type), accounted for 9 percent of the climbers; however, this small group made 25 percent of the ascents! Interestingly, the data when graphed create a beautiful curve, the kind of plot that would excite Dr. C.R. Wylie (See his ascent on August 10, 1938). How is it that motivation, interest in climbing and the ability to do a climb add up to a beautiful curve? We wait for the doctoral thesis on this combination of the mental and physical.

The honor roll of those with more than 3 ascents:

- 16 William Kat
- 10 Alan D. McCharles
- 9 Chris Denny
- 8 Lyn R. Wright, Dave Willis
- 6 George Whitmore
- 5 Judd Boynton, Gerald Ganopole, David Lunn
- 4 Dave Brower, Joe Brower, Bruce Cooke, Ken Boche, Jeff Barton,
Fred Hudson, Ray Jewell, Howard Lewis

Jeffrey Armidillo Sr.	

¹⁵⁴ From Wikipedia: James J. Kilroy, an American shipyard inspector, may have been the man behind the signature. During World War II he worked at a shipyard where he was said to have written “Kilroy was here” to mark rivets he had checked. The idea was to prevent the erasure of chalk marks showing where a riveter ended his shift. Some riveters discovered they could receive extra pay by erasing the previous worker's chalk mark and chalking a mark farther back on the same seam, giving themselves credit for some of the previous riveter's work. Kilroy stopped this practice by writing "Kilroy was here" at the site of each chalk mark. At the time, ships were being sent out before they had been painted, so when sealed areas were opened for maintenance, soldiers found an unexplained name scrawled. Thousands of servicemen may have seen his slogan on ships and Kilroy's omnipresence and inscrutability sparked the legend.

¹⁵⁵ Fred Hudson also climbed Starr King on July 7, 1938, July 28, 1939, June 11, 1941

¹⁵⁶ Also climbed Starr King on June 9, 1951.

For more information about the S.A.C., see "The Stanford Alpine Club" by John Rawlings, CSLI Publications, Stanford University Libraries, Stanford, CA. It is a 194 page volume which gives an excellent history of the S.A.C. It is well illustrated and indexed and has photography edited by Glen Denny¹⁶⁷. A short history of the SAC in Yosemite Valley is in "Camp 4, Recollections of a Yosemite Rock Climber" by Steve Roper, 1994. Mowat was on the first ascent of the Southwest Arete, West Side, of the Middle Brother in Yosemite Valley with

¹⁶⁶ Robertson also climbed Starr King on August 24, 1947

¹⁶⁷ Glen Denny climbed Starr King on June 30, 1965.

Nick Clinch, Dave Harrah and Sherman Lehman. *A Climber's Guide to Yosemite Valley*, Steve Roper, 1964, p. 158.

Marian and Maxine Steineke were the daughters of Max Steineke, an oil geologist in Saudi Arabia in the 1930's. The two girls lived in Dhahran for two years, 1937-1939 and are shown in *Images of America, Early Los Altos and Los Altos Hills* on page 88 standing on a hill overlooking King Saud's encampment. The entire family was outdoors oriented, skiing, hiking, camping. Maxine received a MS from Stanford in 1953 and Marian a BS in 1954. The girls are also mentioned in *Discovery! The Story of ARAMCO Then* by Wallace Stegner, as well as in many other articles on the Internet.

At Stanford Bea (Beatrice) Vogel made some of her own pitons at the Engineering School's metal shop. She earned her PhD in arachnology from Yale, and was also involved in the fight for gender equality – see Chapter 7 of *Liberty and Sexuality – The Right to Privacy and the Making of Roe V. Wade*. Vogel accompanied Warren Harding on the first ascent of the Harding Route on Glacier Point Apron, west side in 1957 in Yosemite Valley.

These little blurbs I put in hardly do justice to the lives people led, but perhaps will assist the curious reader in finding out more.

Beautiful, warm day. 3:15pm from Nevada Falls this morning. Either this is minimum 5th class, or I'm a poor climber. Probably latter.

Joe Fitschen participated in four major first ascents¹⁷⁰ in Yosemite Valley and climbed in many areas, especially Tahquitz Rock, so not much more need be said here except a snippet from a 1956 Tahquitz guide¹⁷¹, “This route (Fitschen’s Folly) commemorates Joe Fitschen’s 170 foot fall from the slabs above the friction route.” He survived! Lucky for me as in 1962 he assisted in rescuing me

¹⁶⁸ CIT is the California Institute of Technology from which Seele would later obtain a degree in Geochemistry. See also September 4, 1977.

¹⁶⁹ Ohrenschall was with Warren Harding on Harding’s first new route, the west face of Sugarloaf Rock near Lake Tahoe - Camp 4, Recollections of a Yosemite Rock Climber by Steve Roper, 1994 p 56. Ohrenschall also made the first ascent of John’s Other Chimney with Mary Ann Corthell in Yosemite Valley and participated in the first free ascent of K-P Pinnacle with Mark Powell - A Climber’s Guide to Yosemite Valley, Steve Roper, 1964, p. 51, 167. Ohrenschall also climbed Starr King on May 30, 1953 and June 26, 1962.

¹⁷⁰ <http://www.yosemiteclimbing.org/content/yosemite-timeline>

¹⁷¹ Climber’s Guide to Tahquitz Rock, Wilts and Wilson, 1956, p35. Fitchen’s Folly is the route, with Fitschen misspelled.

and a climbing partner in Yosemite when my partner was bitten by a rattlesnake on a route up Sunnyside Bench near Lower Yosemite Falls.

Joe sent this account of his Starr King adventure to me, and it was not, as said in the register, “without incident”:

Gordon Seele was sitting on the summit of Alta Peak when my mother and I arrived. Gordon was sixteen and about to be a freshman at the California Institute of Technology (Caltech). He was alone, while I was with my mother, but then I was two years younger. We hiked down together and exchanged addresses and phone numbers when we got to the cars. Differences in age were more crucial than differences in sex or anything else in those teen years. A bullying type might form a small gang of younger kids, or a guy having a little trouble with girls of his own age might see if he seemed more mature and sophisticated to a girl a year younger. Maybe this was more of a west coast phenomenon where it was more unusual than in the east for students to skip grades. Maybe it was more common then than now, but being in a certain grade in school was like being on an island. After that differentiation came social class, rather crudely defined, then religion. Race was not much of a factor since apart from a few Asians there was only one race in Glendale.

The difference in our ages didn't seem to matter to Gordon, perhaps because he didn't feel socially at ease with the older students at Caltech. Perhaps he just wanted someone to hike with. In any case, he could usually borrow his parents' car, and my mother trusted him, so Gordon and I went on a number of day hikes in the local mountains. Even snow in the winter didn't stop us. We would plow through it to some summit, certainly aware of our soggy boots and soaking jeans and cold fingers and ears and toes but not really bothered by it all. Just being in the snow was a novel and stimulating experience for a southern California kid.

The following summer, Gordon started talking about a more serious climb. He had a friend, Jesse, who wanted to climb Mt. Starr King, a cone of a dome tucked away behind Half Dome in Yosemite and a few hundred feet higher in elevation. None of the Sierra Clubbers I talked to knew much about it. Getting to the summit wasn't just a hike. At one time

in the nineteenth century it was regarded, along with Half Dome itself, as one of the three remaining “problems” in the Yosemite region. Jesse’s mother wanted to spend a few days hiking in Yosemite, so late in the summer the four of us drove up to the Valley in her Nash. This was my first trip to Yosemite, and we surely drove through the tunnel and stopped to take in that magnificent view, and I surely saw El Capitan and the Cathedral Rocks rising like guardians at the gates and a little farther on Sentinel Rock and then, rising a mile above the head of the Valley, Half Dome and Clouds Rest. I saw, in short, a large part of my future, but I remember none of it. My mind was on Mt. Starr King. Gordon, Jesse, and I hoisted heavy packs and started up the Mist Trail past Vernal Fall and Nevada Fall. At the top of Nevada Fall, Jesse, who seemed to know where he was going, headed off the trail into the woods. We found large patches of underbrush. We found mazes of downed trees. We found that we could not see very far through the trees and could not be sure we were going in the right direction. We staggered on. We had estimated it would take a few hours to get to the base of the dome, but we didn’t find it until late afternoon.

Jesse, who paraded some expertise in the higher levels of mountaineering, told us how earlier alpinists would coat the base of their boots with pine pitch in order to get a better grip on the smooth granite. We considered the technique, but decided it was more trouble than it was worth, and the route didn’t look that steep. Jesse, expecting difficulties, had brought along some equipment to aid our ascent. He pulled from his pack 100 feet of quarter-inch manila rope. When I became more involved with real climbers I found that the lore of those days was rife with tales of young lads heading up to the cliffs with coils of clothesline, so we were relatively well equipped. (Still, mothers should hide the clothesline as well as the cleaning supplies and pistols used for self-defense. Uncounted numbers of our youth have been killed, or even maimed, because they foolishly relied on clothesline. Parachute cord is not much better and should exhibit product safety warning labels. All the same, even life is hazardous and may lead to death.) Jesse also produced a few Star drills and some eye bolts. You drilled a hole, he explained, put the bolt in the hole, and then threaded the rope through the hole in the bolt. Jesse didn’t have, nor seem to know about, pitons, carabiners, standard 7/16-inch

nylon climbing rope, or expansion bolts. As luck would have it, such equipment wasn't necessary for an ascent of Mt. Starr King and wouldn't have been useful since none of us knew even the rudiments of placing pitons or using the rope to belay another climber.

The next morning, with spirits high, we tackled the peak eager for success. The route was not very long or very difficult, but I remember thinking more than once that it would be best not to slip and fall. Taking note of this, however, is a long cry from being afraid of falling. Because of some quirk of neuronal wiring, exposure without fear equals exhilaration. This heightened state is probably a legacy of the prehistoric hunters. Fearful hunters did not survive. Exhilarated hunters not only returned with full bags but felt like going out again. Too simple a theory, perhaps, but the better climbers I know are in one way or another exhilaration junkies—not daredevils, not thrill seekers, but looking for that rush that's often equated with freedom.

The granite slabs rising in a smooth line to the summit looked steeper than they actually were, the effect of foreshortening that the experienced mountaineer is accustomed to. Such an experienced climber could probably walk up these slabs with his hands in his pockets, but I didn't know enough to trust my feet, and consequently I clawed at every available crack or handhold and was elated to find the occasional small ledge on which to rest. My heart pounded like a woodpecker and I panted like a hound. All of this made it seem like an even greater adventure.

In due course we stopped while Jesse drilled a hole (oh, the shame of it in retrospect). The point of this bolt placement was not to promote our safety. Rather, Jesse also had brought along an eight-millimeter movie camera, and he used the rope, doubled through the bolt, to support him while he moved out on the smooth face to be in a better position to film our desperate progress. He repeated this process several times as we got higher, so important was it that our feat should be duly recorded (who knows what visions now occupy the compressed files of innumerable video cams). Higher, the angle lessened, and we strolled up to the summit where we found a register stashed in a cairn. We signed our names, and while reading through the accounts of previous ascents I came across a

note someone had written earlier in the summer. The climber had left the Valley in the morning, hiked up a trail different from our route, ascended a steeper route on the other side of the peak by himself, and had arrived on top at two in the afternoon which left him plenty of time to get back down to the Valley well before dark. We were late into our second day and would not return to the car until the afternoon of the third day. We had succeeded in turning a day's ramble into a three-day siege. Suddenly, our achievement seemed to lack finesse, style, skill. There was more to this climbing game than we had dreamed.

Climbing down is sometimes more tricky than climbing up, so we used the doubled rope through the bolts as a hand line on the steeper sections. I guess we had a bit of luck since the bolts stayed in the holes. We could easily have removed them by pulling out on them, but the tension from the rope and the low angle combined to keep them in place. Sometimes innocents get away with things; sometimes they don't.

I'm not sure when I last saw Gordon, but I don't remember any specific trips with him after that one. I was going on more and more Sierra Club trips, and I found that if the back packing and peak bagging were arduous enough my mother was not interested and would let others act *in loco parentis*. Perhaps in his second year at Caltech Gordon was adapting to the social scene, was able to make friends with the older students, and was becoming more self-conscious about hanging out with someone two years younger than himself. It was a friendship I would have liked to last longer.

Joe's method of ascent is not to be emulated, and the warning must be repeated:

Climbing is dangerous. Climb at your own risk.

You can be seriously injured or killed in this sport.

THE CLIMB HAS JUST
BEGUN.

Mary Ann Corthell¹⁷³, YP&CC

Norah Straley¹⁷⁴ Sierra Club

H.C. King HMC¹⁷⁵ AAC

J. Davis SC RCS

By the year and the companions, J. Davis is probably Jack Davis¹⁷⁶ who participated in four first ascents¹⁷⁷ in Yosemite Valley. This entry highlights a problem of looking up people with common last names and no complete first name. Jack Davis' first ascents were the Northwest Ledges on Cloud's Rest, the Northwest Buttress of Middle Cathedral Rock, the East Buttress of Middle Cathedral Rock, and the North Face Traverse of Middle Cathedral Rock.

¹⁷² Ohrenschall also climbed Starr King on October 12, 1952 and June 26, 1962.

¹⁷³ Mary Ann Corthell made the first ascent of John's Other Chimney with John Ohrenschall in Yosemite Valley. A Climber's Guide to Yosemite Valley, Steve Roper, 1964, p. 167. Her name would become Mary Ann Matthews, but she was also known as Corky. She was a Stanford graduate and active in the Stanford Alpine Club. See also her July 15, 1966 and her July 21, 1967 entries in this register.

¹⁷⁴ Norah Straley was on the first ascent of the East Face of Ragged Peak with Warren Harding and Ray Alcott on August 16, 1953.

John Ochsner, Beginner, Shore Acres Houston Texas

We're glad they made it!! attn Bay, Ralphie

¹⁷⁹ Blister rust is a fungus that attacks pine trees. An intermediate host for the fungus is the gooseberry bush (genus *Ribes*). Control refers to a project in many public forests where the gooseberry bushes are eradicated by spraying a chemical similar to Agent Orange.

PAGES MISSING.

The climbing year of 1954

The last entry on this page is from October 13, 1953. The entry on the following page is from May 21, 1955. Considering the number of climbs normally made in a year, it is likely that pages were removed here containing 1954 entries.

¹⁸⁰ On June 2, 1951 David Hammack was on the first ascent of a class 4 Middle Brother route named From Michael's Ledge with Ronald Hahn, Anton Nelson, and John Salathé. A Climber's Guide to Yosemite Valley, Steve Roper, 1964, p. 71

¹⁸¹ In 1950 Dave Hammack and George Larimore made the first ascent of the Gorge Traverse between the upper and lower Yosemite falls. A Climber's Guide to Yosemite Valley, Steve Roper, 1964, p. 90

¹⁸² George Whitmore was on a number of first ascents in Yosemite Valley including the El Capitan Nose in 1958 with Warren Harding and Wayne Merry. The others: Sentinel Spire in 1954 with Warren Harding, Arch Rock Pinnacle in 1955 with Warren Harding, Lost Brother from the Southwest Side in 1958 with Merle Alley, the Ahwahnee Buttress in 1959 with Merle Alley, George Sessions and Jerry Dixon, and Nickel Pinnacle from the Notch with Mark Powell. A Climber's Guide to Yosemite Valley, Steve Roper, 1964. Whitmore also ascended Starr King on April 30, 1960, April 9, 1961, October 26, 1969, May 29, 1974, and April 29, 1979.

John Henneberger – NPS
SE Saddle

George Sessions¹⁸⁴ went on to participate in six first ascents in Yosemite Valley. Calderwood had five¹⁸⁵ in addition to spending some time on the Nose of El Capitan with Harding as the first ascent unfolded. In 1960 I picked up Calderwood as a partner on the first ascent of Coonyard Pinnacle on Glacier Point Apron, the pre-eminent location for friction climbing in Yosemite Valley. He was a solid climber and a good companion. He later taught rock climbing at a Junior College in Fresno.

¹⁸³ Also climbed the peak on June 17, 1958

¹⁸⁴ Sessions' first ascents: Spireview Point, Bear Rock Bolt Route, Lower Watkins Pinnacle, Penny-Nickel Arete, Pohono Pinnacle North Face, Ahwahnee Buttress. First free ascent of Arches Terrace. Sessions also climbed Starr King on July 30, 1956, May 30, 1959 and July 25, 1965.

¹⁸⁵ Calderwood's first ascents: Arches Terrace, Phantom Pinnacle Left Side, Coonyard Pinnacle, Hangover Buttress, Juliette's Flake Right Side, First free ascent of Arches Terrace.

Richard Sheffield, San Diego RCS

Two preons [sic] expected up in the near future [sic]

Bill Feuerer¹⁹¹ RCS

Herb White¹⁹², Lynbrook New York

This is a reunion for McCharles and Wright who were last up together in 1937. McCharles is done now, but Wright will have three more ascents after this one.

Bill Feuerer attained enduring fame in the climbing community as “The Dolt” for his climbing equipment. As a rock climber and student at UCLA I frequented his shop, The Dolt Hut, on Sawtelle Blvd in Los Angeles from 1959-1960. Bill was a slow talker but not a dolt. He was on the start of the El Capitan Nose project with Harding in 1957, and one prominent ledge on the route was named “Dolt Tower” after Feuerer. He is listed on five first ascents in Yosemite Valley, The Arrowhead Arete, Lower Cathedral Rock North Buttress, The Footstool Right

¹⁸⁶ John Yeager also ascended Starr King on June 1, 1957 and June 21, 1958.

¹⁸⁷ Wright also ascended Starr King on July 24, 1933, July 15, 1934, Jul 20, 1937, October 13, 1956, June 1, 1957, June 21, 1958 and June 25, 1960.

¹⁸⁸ Florence Richmond’s also ascended Starr King on October 13, 1956.

¹⁸⁹ His other ascents of Starr King: July 24, 1933, June 11, 1934, July 15, 1934, July 1, 1935, July 6, 1935, August 17, 1935, June 30, 1936, July 20, 1937, July 23, 1937.

¹⁹⁰ Clarence Richmond’s also ascended Starr King on October 13, 1956.

¹⁹¹ Feuerer also ascended Starr King on May 30, 1971

¹⁹² White also ascended Starr King on July 1, 1956.

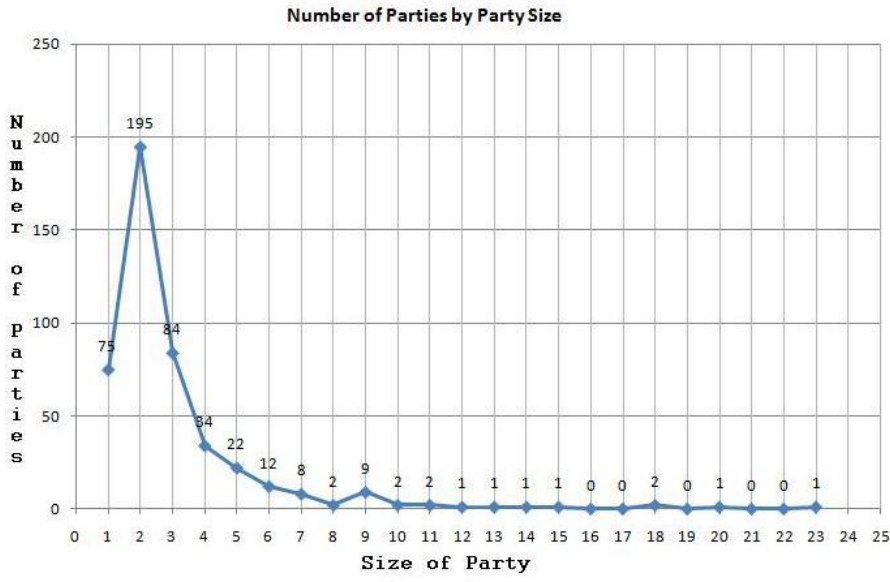

Side, Penny Pinnacle East Arete and Rixon’s Pinnacle West Face. He is also listed for a first free ascent of the Overhang Route on Lower Cathedral Rock. All except Rixon’s (done with Tom Frost) were climbed with Mark Powell. The reader is directed to Camp 4, Recollections of a Yosemite Rock Climber by Steve Roper for a wealth of detail about Bill Feuerer.

Another statistic that can be found in the registers is the distribution of the number of climbers in the parties that ascend the peak.

Party Size	Number of Parties	Number of Climbers			
1	75	75			
2	195	390	13	1	13
3	84	252	14	1	14
4	34	136	15	1	15
5	22	110	16	0	0
6	12	72	17	0	0
7	8	56	18	2	36
8	2	16	19	0	0
9	9	81	20	1	20
10	2	20	21	0	0
11	2	22	22	0	0
12	1	12	23	1	23
			Totals	453	1363

A party size of “1” means the climb was a solo endeavor, no ropes and essentially done third class. A party size of 23 means a group ascent by an organization such as the Sierra Club’s Sierra Peaks Section. Plotting the two variables, party size and number of parties ascending the peak, we get a beautiful curve in which only

parties of nine stand out as anomalous. Why people sort themselves so neatly into groups of differing sizes, solo climbers aside, is an interesting question for the psychologists who concern themselves with risk and its mitigation.

Steve Roper's name is known to climbers around the world for his guide books and other writings. Two of his books are a must for the reader of this register: Camp 4 - Recollections of a Yosemite Rockclimber and A Climber's Guide to Yosemite Valley (red or green). The books give excellent history of much of the times covered by the Starr King registers. Steve lived in Berkeley at the time of this ascent and was a frequenter of Indian Rock and other Bay Area climbing locales when I was in Berkeley. Our names are linked in Yosemite by our first ascent with Tom Naylor of Nevada Flake, a slab resting on the cliff to the right of Nevada Falls. And so in March 2007 I sent a copy of the register page to Steve and he replied with a description of his second climb of Mt. Starr King in 2002, 43 years after his first:

²²⁰ Ritter's Yosemite First Ascents: Lower Arch Traverse, Penny-Nickel Arete, Split Pinnacle East Arete, Goodrich Pinnacle Left Side, Goodrich Pinnacle-Coonyard Traverse. First Free Ascent: Circular Staircase,

²²¹ Baxter's Yosemite First Ascents: Middle Watkins Pinnacle, Upper Watkins Pinnacle. He was a founding member of the Stanford Alpine Club. Whether the date is 1957 or 1959 is an open question.

September 16, 2002: David Cook and I are off to Mono Meadows Trailhead on the Glacier Point Road, then a one-hour hike with huge packs down to a campsite on the opposite side of Illilouette Creek, which we had been unable to cross in July 1998. Easy this time, with good rocks keeping our feet dry.

September 17, 2002: Off at dawn for Mt. Starr King, which I hadn't climbed since July 8, 1959. The approach, also with huge packs (rope, rack, 8 quarts of water, clothes, food etc.) was strenuous, with some deadfall, a bit of Manzanita and interminable steep slabs covered with ball-bearing grit. It took probably three hours to gain the 2,500 feet to the top of the lower, middle dome. Here I saw an amazing sight at this remote place at this hour on a weekday in mid- September: two 35- to 40-year-olds gazing upward at the main dome. They turned out to be brothers named Strickland who had a rope and a rack but were staring at what looked like a nasty route. They decided to watch us.

We raced up the route in less than 20 minutes, Cook leading the "hard" section, a 30-foot 5.3 corner. I led off from his belay spot (the route above doesn't go up a nasty- looking, right-slanting slot but rather goes out left and up easy friction) for about 100 feet to the unroping spot. The summit was five minutes away. Great views of Half Dome and the Tuolumne area. We descended with the rope off poor anchors, usually using a hand line but two stretches with short rappels. The two brothers were impressed, saying they would forego the experience. "We don't have your confidence," one brother said. This made our day, naturally.

Back to camp around 1:30 p.m. with very tired legs.

September 18, 2002: Off near first light. The three-mile journey out was very hard on the legs and took probably 90 minutes (a 1,000-foot elevation gain). Back in Oakland by 1 p.m.

Roper's write up contains valuable advice. First is the Illilouette Creek which can run so high in spring and early summer that crossing it may be impossible or dangerous. A register entry on August 6, 1967 indicates that a climber drowned on the return of a July 4, 1967 trip up the peak. The second piece of advice is that the approach to the Anderson route contains unsure footing in places as well as the possibility of running into Manzanita thickets. Finally, the difficulty ratings of the route vary from Third Class to Fifth Class, depending on the climber and the day. Friction climbing is usually on low angle rock, but it sometimes is hard for one to

become adjusted to the lack of positive holds.

George W. Whitmore²²⁵, Fresno

Aside from assigning 31 days to April, Whitmore's ascent highlights a problem that has plagued the Yosemite rock climbing community, the placement of unnecessary bolts which scar and alter the rock permanently. Mt. Starr King had been climbed by people alone and in tennis shoes as a reading of this register shows. Other winter ascents of the peak were made without bolts, including the first in 1937. Whitmore could have done as the climbers did on November 6, 1971, declare "No guts" and go around to the Southeast route.

²²² Mt Starr King ascents on October 15, 1961, July 7, 1962

²²³ Lindley's other Starr King ascent was on October 15, 1961

²²⁴ Wilson's First ascents in Yosemite Valley: El Capitan East Ledge Traverse, Watkins Pinnacles from Tenaya Canyon, Higher Cathedral Spire North Couloir, Diving Board - Sunshine Buttress, Nevada Flake Right Side, Vernal Falls Right Side. Wilson, a physicist, was also on exploratory first ascent attempts at the North Face of Sentinel Rock and the Northwest Face of Half Dome - See Camp 4, Recollections of a Yosemite Rockclimber by Steve Roper. Wilson also participated in the first ascent of Hummingbird Ridge on Mt. Logan in 1966. Ascent 1967.

²²⁵ Whitmore also ascended Starr King on October 10, 1953, April 9, 1961, October 26, 1969, May 29, 1974, and April 29, 1979.

²³¹ Also climbed the peak on June 1, 1957

career which would see him become one of the greats²³² in Yosemite rock climbing history. I was privileged to have known Frank for a year or so and did many climbs with him in Yosemite in the fall of 1961. Frank is given a good write-up by Steve Roper in *Camp 4, Recollections of a Yosemite Rockclimber*. Frank died in 1978 on The Shroud in the Swiss Alps. He was working as a theoretical physicist at Cern at the time and was buried in a small cemetery in Chamonix. In May 2010 his ashes were returned to the United States through the efforts of Janice Sacherer, and after a ceremony were cast to the winds in Yosemite National Park.

By now we have all but forgotten about William Kat who made so many ascents of Mt. Starr King in the 1930's and 1940's. But he was not entirely done with the mountain. On page 34 of *The Ahwahnee, Yosemite's Classic Hotel*, Shirley Sargent has this: "Kat ... remained with the [Yosemite Park and Curry] Company until his retirement in 1946. At 88, he made his 20th ascent of Mount Starr King and lived until the age of 97..."

Sometimes authors get it a little wrong, and that's forgivable if it makes a better story. In this instance the author made two errors: William Kat was born June 20, 1875 and was within a week of being 85 years old in 1960 when he and I, Bill Amborn, his 18 year old grandson, set out to climb Mt. Starr King for what he told me would be his 20th ascent. The second error is apparent when one does not see our signatures in the register. This is what really happened....

We walked over to the store and purchased food for the hike and climb. I let Grandpa do all the shopping to ensure that he would get what he, a vegetarian, liked. Nuts, raisins, bread, and chocolate were picked. I grabbed a can of tuna and a pack of mincemeat so I wouldn't starve. With that done, I was to meet him at 5:00 am and we would head out. Of course, for me to get there at 5:00 I had to be up earlier so I could walk the mile or two across the Valley from Camp 4 to the Housekeeping area.

²³² Thirty three first ascents or first free ascents are attributed to Sacherer in five seasons, a stout record for the time, or any time.

At 5:00 we started out in the coming light, past the aroma of burning trash at the dump that used to be a little ways from Camp Curry and the multitude of bears hanging around it. We went up the mist trail to the top of Vernal Falls in the still morning air and then continued on the foot trail to the top of Nevada Falls which we reached about 9. We weren't fast, but it seemed we did OK. At the top of Nevada Falls the trail is on the left side of the river, but we had to be on the right side to go up to the peak, so we immediately were hiking cross country trending ever up. We needed to gain about 3000 feet to get to the summit dome. Above 6000 feet walking uphill can be hard work if one is not fit, or if one is 85. We slowed dramatically as the elevation increased, and at about 8000 feet I suggested perhaps it was too much and we should go back as Grandpa was breathing heavily and resting every ten steps. I was carrying all the gear, climbing rope, food, water, so he was unencumbered. I was in top condition and was just idling along and so got a lot of great views of the side of Half Dome you normally don't see as we made our way up the slope. Red snow plants peaked out of the soil.

Grandpa would hear none of turning back, and above 8000 feet continued with ten small steps, then rest, ten steps, then rest, with the rest times getting longer as we went up. It was excruciatingly slow, and I could tell by the sun that time was beginning to move against us as we needed to be get back down to the Valley before dark. In our favor was the fact that June has the most daylight, but even so going down can be difficult when one is tired.

We finally reached the base of the summit dome on the Northeast side. We had no watch, but by compass, a stick, and a circle drawn in the dirt I figured it was about 3pm, although it was probably later. We had been going for at least 10 hours, and we only had five or six hours of light left. I again suggested that we go back, but Grandpa said, "No, let's give a try." I looked at him and his face was a bluish hue, and at that moment I realized I had made a terrible error in bringing him up that far, and we were perhaps going to be in trouble. So I said that the route looked too tough for us, and that he was too tired. Grandpa said not to worry, I should just climb up and he would not climb, but go hand over hand up the rope. I looked at his hands, incredibly thick and tough from a life of carpentry, and almost agreed, but then thought that if he lost his grip on the rope he would fall and would surely die - if not from the fall, then from exposure in the night. I said it just looked too hard for me, and I was afraid for something bad

going wrong if I fell. He looked at me and said, "I understand, Bill. We go down."

We took a short break, finished the water, and Grandpa said we could get back faster if we went down a different way than we had come up. This is against the general rule of going down a different way unless it is known in advance, but he had been up there 19 times before, so I agreed. Instead of going back down to the main trail on the Merced River at the top of Nevada Falls, we would go down a steeper but shorter looking route down the northwest side of the peak toward Illilouette Creek where we would pick up the trail to the top of Nevada Falls.

As it turned out, we ended up in an extensive talus slope covered with Manzanita bushes. Manzanita grows and then partly dies so the branches are inflexible and tear at your clothes as you bushwhack through them. The slope was mostly rubble and footing was not good. We went slowly, even with gravity on our side. It is often the case that a steep descent is as difficult as the ascent, or more so if one is tired. We reached the trail by the creek as light was fading in the canyon and headed toward the Merced River. I had Grandpa lead the way so he could set the pace at whatever was comfortable, and it was a good thing, too, as I had to shout at him a couple of times as he started to walk off the trail. It was then he told me his vision wasn't so good in the twilight and dark, and that I should lead the way. I later learned he was becoming blind in one eye. I hoped for a moon to light up the night, but there was none. That night would get so dark you could see the Milky Way with a glance.

I started to lead the way slowly, constantly glancing back, and again he walked off the trail. I told Grandpa that it was no good; we were going to have to stop. But he said, "No, you get a stick and you hold on to one end, and I will hold onto the other and you will lead me down." The next time he walked off the trail holding the stick while I was still on the trail, he walked on the other side of a tree and almost knocked us both over. We agreed to stop for the night.

The first problem I had to address was water. It was difficult to get down to the crashing stream at the bottom of the canyon to get some and then climb back up in near dark over granite covered by slick pine needles. That done, I had to get a fire going. I thanked my lucky stars I had tossed matches into my pack, just in case. It was hard finding sticks to burn in the dark, and I had to do plenty of work to

kick out a barrier around where the fire was to be so as not to set off a forest fire, although the thought occurred to me that might have gotten us some help. I asked Grandpa if he wanted me to run down to the Valley and get help, but that really made him testy, “No, I will walk out tomorrow.” So we began the night, first with finishing the only food left, the bread which we toasted over the fire, then with trying to stay warm. As the night went on, Grandpa who had only a shirt and sweater was shivering and making noises and I was worried so I put my sweatshirt on him and spent the night in a t-shirt. I rotated sides every so often and kept the fire going all the time, hot on one side, frozen on the other. We spent the night at about 6500 feet in the open, and it wasn’t warm. We were lucky that the night was not really cold and the air was still.

With the first light we began the walk down to the Valley and made it by about 9 a.m., another four hours on the trail. I left Grandpa at his housekeeping cabin and caught the bus for my summer job. I got all kinds of flak from my Mom and Aunt who asked what had been going on in my mind to take Grandpa on the trek. Apparently he was told by the doctor not to leave the Valley floor due to his heart. What could I say? No one told me.

During the summer up in Idaho at the Forest Service Camp where I worked I got a letter from Grandpa with just a couple of sentences where he thanked me for accompanying him up Mt Starr King, and he said that he was sorry that he couldn’t make it.

²³³ Died in an October 1976 climbing accident on Dunagiri in the Garwhal Himalaya of India. From the web site of the Angeles Chapter of the Sierra Club. Stephenson also climbed Starr King on July 4, 1967.

²³⁴ In 2001 Smatko received the Sierra Club's Francis P. Farquhar Award for his achievements as a mountaineer and author of mountaineering books. Since 1953, Smatko made more than 1,800 ascents in the Sierra Nevada. He prepared the Mountaineer's Guide to the High Sierra, which was published by the Sierra Club in 1972, and also helped revise the 1954 book, A Climber's Guide to the High Sierra.

²³⁵ I recall a Frede Jensen at U.C.L.A. in 1958-60 who was a prolific peak bagger, and this is undoubtedly he who has just finished climbing 100 peaks on the Sierra Club's Sierra Peaks Section list. He leaves a quote under his name in Italian, but I am unable to completely make it out (part may read in translation, "with trouble and pain that here graces my heart... Cino da Pistoia [the author of the quote, a 13th century Italian]"). In 1991 Frede Jensen received an award for creative and scholarly research at the University of Colorado for work in French and Italian, and he has many published works. Sierra Club web site.

²³⁶ Whitmore also ascended Starr King on October 10, 1953, April 30, 1960, October 26, 1969, May 29, 1974, and April 29, 1979.

²³⁷ The first name is difficult to read and may be incorrect.

Oct 15, 1961 Bruce Morris²³⁹, Carlmont Alpine Club
[the rest of the party is on the following page]

Carlmont is a section of Belmont, California, a town down the peninsula from San Francisco. This is the second mention of the Carlmont Alpine Club, the first being on October 11, 1959. By the entry on the following page we see that the club was associated with the Carlmont YMCA. Bruce Morris got a taste of rock climbing, and it grew on him. I noted a Bruce Morris associated with 34 first ascents in Yosemite Valley from 1977 to 1989 and sent an e-mail to him to see if he was one and the same. He replied, "Yes, that was me and I was just 14, out of 8th grade, and starting as a freshman at Aragon High School. My mother read about the Carlmont Alpine Club which was run by Phil Arnot in Belmont and signed me up for my first climbing trip with the group. We drove up from Belmont, slept in the Valley, then hiked up to Star King Meadows. The next day, a Sunday, we climbed Mt. Starr King, hiked out and drove back to the Bay. ... Up until 1961, the only mountaineering I'd done had been with my dad: Lemberert Dome and Mt. Lassen I think. Made a solo ascent of Mt Dana in August 1961 too. So Mt Starr King was my first "technical" climb with ropes and rappelling gear. Can still remember going into Starr King Meadow with Phil [Arnot] and the gang." His mother was advanced in her thinking.

²³⁸ Wolcott also ascended Starr King on June 25, 1960

Splendid day.

6 Sept 1964 Eric Beck. Solo with one arm from saddle. Spooky. The descent should be even spookier.

9/7/64 Bruce Cooke²⁶³, Oakland. Both routes.

Beck was not joking about climbing with one arm. He broke his arm in a fall on Middle Cathedral Rock, and to fix it, steel pins were inserted.²⁶⁴ I posted a question on the Supertopo.com climber's forum and Eric replied, "Wow, what a trip into the past. This was a 2 day trip to bag Starr King and Mt Clark. I was in mountain boots. The descent was indeed scary, backed up and down several times

²⁵⁹ Dave French was on the first ascent of the Lost Brother Northwest Face. He is also a character in "You're Standing on My Fingers" by H. Warren Lewis. Lewis' entries are on July 5, 1963, May 30, 1964, May 31, 1968, and May 30, 1971.

²⁶⁰ Holden was on the first ascent of Middle Cathedral Rock North Buttress

²⁶¹ Irvin was on the first ascent of Spireview Point. He also ascended Starr King on July 12, 1969.

²⁶² Thiebaut also climbed Starr King on May 15, 1960

²⁶³ Bruce Cooke's other ascents: August 27, 1949, October 12, 1964, June 27, 1966

²⁶⁴ Camp 4, Recollections of a Yosemite Rockclimber, p 162

before committing to the moves. ... How do we survive the bright ideas of our youth?" Another forum responder said, "I remember his arm in a cast with a right-angle bend at the elbow. When eating fried chicken, he could not lick his fingers." That was real torture!

Eric Beck was one of the outstanding rock climbers in Yosemite Valley having participated in eleven first ascents from 1962 to 1971. He and I were on a rope together for my first multi-pitch climb at Tahquitz in March 1959, White Maiden's Walkaway.

Bruce Cooke first appears in this register for his August 27, 1949 ascent with his brother Kenyon. Bruce is a well remembered climber for his times at Indian Rock in Berkeley and elsewhere. A route was named after him in the Tuolumne Meadows area, The Cooke Book on Daff Dome. "I will never forget Bruce Cooke - in his 60's then - wheeling up on his bike, lacing his shoes and cranking off one arms [pull-ups] from a fist jam in the tree in the Pit [at Indian Rock in Berkeley] before gracefully floating up all kinds of problems others flailed upon." – Rick L.²⁶⁵ Tom Higgins also has information about Bruce Cooke at his (Higgin's) website, and Kenyon Cooke's family wrote a short piece for the 10th Mountain Division in which Bruce and Kenyon served in WWII:

Brothers Kenyon K. and Bruce B. Cooke had enjoyed mountaineering and climbing in the Sierra Nevada Mountains of California, and it was this experience that led them to the 10th Mountain Division.

Kenyon joined first, after completing a semester as a geology major at U.C. Berkeley. Bruce followed, after securing permission to leave his job as a blacksmith at Mare Island Naval Shipyard. They trained at Camp Hale and Camp Swift. Kenyon completed ice climbing school at Mt. Rainier. When they shipped out on the USS West Point in January, 1945 headed for combat, Kenyon left behind his bride, Audrey, and their unborn child.

With their respective units, Kenyon and Bruce were soon engaged in the successful battle to take Mt. Belvedere. This was followed

²⁶⁵ Supertopo.com

by an intensely fierce and exhausting fight for Mt. della Spe. Then it was on through the North Apennines and the Po Valley. The end of the struggle came with the German surrender on May 2, 1945. From the battlefield, Kenyon had written a poem for his bride titled “Night on della Spe.” In it, he wrote of the horrors of war and his dreams of home and future:

(that the sounds of mortar and gunfire)...
“Would cease forever and we all would know
The joy of living, free from fear
Not having to listen – for what would we hear?
A woman laughing, a baby’s cry!”

Kenyon and Bruce were among those fortunate who returned home on the Marine Fox in August, 1945 to fulfill those dreams and tell the remarkable tale of the 10th Mountain Division.

Upon his return home, Kenyon wrote of his experiences while they were still fresh in his mind. This account has been published as Chapter 4 in *Good Times, Bad Times*, and many of the pictures he took appear throughout the book. While in Italy, Bruce wrote a letter to their parents describing his experiences. This letter is also contained in the book.

Bruce was awarded the Bronze Star for his attempts to save the life of a fellow soldier. When he came home, he returned to work at Mare Island and Hunters Point Naval shipyards. Bruce was a blacksmith, philosopher, sharp-shooter, poet, and cyclist, but his passion was climbing. A world-class climber, he completed over 750 climbs between 1941 and 1982, mostly in the Sierras. Several of his climbs were first ascents, and many were solo. But he also enjoyed climbing with Kenyon, Kenyon’s children, and his many friends. This tough guy with a heart of gold opened the world of mountains to his family; their majesty and beauty surpassed only by his courage and wisdom. While he had no children of his own, he was a beloved inspiration to Kenyon and Audrey, and all of his nieces and nephews.

Kenyon returned home to his wife Audrey, and three month old Kathleen. As time passed, the family grew to include Laura, Cecile, Janice, Kenyon, Karen, Virginia, Michael, Marjorie, Joseph, Marianne,

and Rosalie. A baby cry, indeed! Our father took us camping and backpacking. He taught us to climb and fish. He made us laugh and took us to see “where this road goes”. A man of impeccable character, by his example he taught us the meaning of integrity, honesty, tolerance, loyalty, love, and the value of family, home, and work. He instilled in us a deep appreciation of the values and principles for which he and Bruce, and their fellow soldiers had sacrificed so much. Retired Senior Pilot Plant Operator for Shell Development, Kenyon was married to his sweetheart Audrey for 52 years. Together they raised 12 good people, and had 26 grandchildren and 6 great grandchildren.

Kenyon and Bruce told us their stories, took us on adventures, and opened our hearts and minds to the wonders they knew. They gave us themselves, gave us our world. We are very grateful and proud that Kenyon was our father, and Bruce was our uncle.

July 25, 1965 5 ½ hours from Happy Isles. 2:10 PM Massive cn's²⁷³ from Zenith to all north ½ sky. 2 drops rain at noon. Waited 35 years for this.

Jack G. Kirk, Mariposa Calif. (The Dipsea Deamon [sic] – see Ax Nelson Oct 23, 1949)

Pete C. Gamache, Auburn, Maine. “Illigiticum non carborundum”²⁷⁴
Appalachian Mt. Club

George S. Sessions, University of Chicago²⁷⁵ Mountaineering Club. 1st time in 9²⁷⁶ years.

Jack Kirk's entry is primary evidence that pages were torn out for the 1949-1950 climbing season, and one of the climbers whose entry is missing was Anton (Ax) Nelson (see the page beginning June 28, 1948). No mention of Salathé is made, so where his entry might have been is still a question. Jack Kirk also has two other comments of interest, “waited 35 years for this” and “Dipsea Deamon”. The thirty five year wait probably refers to the first change in handicapping the Dipsea Race which went from Mill Valley over the mountain to Stinson Beach. The race organizers finally changed the handicapping from a somewhat arbitrary basis to a clear cut age related basis. Jack Kirk first ran the race in 1930, so this entry is 35 years later, just when the change was made. He won in 1967, so it worked for him! Since he is connecting this to Anton Nelson, there may have been a competition. Unfortunately, we are missing Nelson's entry. Kirk was known as the Dipsea Demon for his outstanding performances and the longevity of his entries. Kirk ran in 67 consecutive races from 1930 to 2002. There were a couple of years when the race was not run in the Depression and three in World War II. Kirk's last run was at age 95. A movie was made of him and the race, *The Dipsea Demon*.²⁷⁷

²⁷³ Cumulonimbus (thunderstorm) clouds

²⁷⁴ Don't let the bastards grind you down. A popular, grammatically incorrect, pseudo Latin phrase.

²⁷⁵ Sessions was involved in the field of Ecology. Also climbed Starr King on May 29, 1955, July 30, 1956 and May 30, 1959.

²⁷⁶ Correct number is 7, according to the register.

²⁷⁷ Information about Kirk came from the Marin Independent Journal, various articles.

This is a most beautiful Sierra day. Bright sun, cool breeze, a few cumulus decorating the sky. After an hour who should appear but Bill Scoville, solo, with Kelty. A happy reunion. RCB

As footnoted in Rankin's previous ascent of Mt. Starr King, he introduced Warren Harding to climbing. Adolf Baur was a German alpinist who who went on numerous trips with Rankin. On Supertopo.com this was written: "As I recall, he (Harding) came to several "dynamic belay practice" sessions Jack (Rankin) held at some property he had down in the Sacramento River bottoms. We'd hoist a 200 lb concrete block up a tree using rope wrapped around a washing machine agitator bolted to Jack's car wheel. The belayer would request slack be let out (say, 20 feet of white Columbia) and the block would be dropped. The belayer used a hip belay with a leather butt patch and gloves. Smoke was produced, the belayer most often upended, and the lesson, in those days, was "the leader must not fall!" Times have certainly changed!" [Storer]

²⁸³ Nelson's other Starr King ascent was on July 11, 1965

July 3, 66 WM Wichman²⁹⁰, Menlo Park

Bob Vaile²⁹¹, Atherton

From SE Saddle

Bruce Cooke, age 47, calls himself “clutchrock”, a reference to his hand strength no doubt. Cooke was an iron worker at Mare Island and still engaging in what is mostly a young man's sport. Relating to about this time a comment was posted on Supertopo.com regarding Cooke, “I am not sure how old Bruce was then, but he was an old guy compared to any of us. At Indian Rock, he would do one of the overhanging routes without using his feet, just letting them dangle while he did a succession of pull-ups and quick grabs to the next hold.” [DrDeeg]

²⁸⁷ Scoville is a character in H. Warren Lewis' book, *You're Standing on My Fingers*. Lewis' entries are on July 5, 1963, May 30, 1964, May 31, 1968, and May 30, 1971.

²⁸⁸ Bruce Cooke's other ascents: August 27, 1949, September 7, 1964, October 12, 1964

²⁸⁹ Steve Herrero had three first ascents in Yosemite Valley.

²⁹⁰ In 1968 Wichman was a PhD student at Stanford in the field of Computer Science.

²⁹¹ Bob Vaile was head of the Physics Department of the Stanford Research Institute from 1955 to 1970.

³¹³ Los Padres High School

Starr King on July 4, 1967, above. Bill Oliver of the SPS graciously furnished the trip report from the Sierra Echo, July 1967, page 15:

CLARK RANGE TRIP - July 1-4. 1967 Bill Hunt

Thirty-seven Sierra Peaks Section [of the Sierra Club] members and guests set out from the Mono Meadows trailhead in Yosemite National Park at 8:30 A.M. on Saturday. July 1. That very warm day was spent backpacking about 12 miles to a campsite at 8,800 feet on Ottoway Creek a mile below Lower Ottoway lake. The next morning at 7:00 A.M. 27 climbers departed for Merced Peak and a long day of climbing. Twenty-six gained the summit of 11,726 foot Merced, most of the climb being on very wet fairly soft snow.

After this climb most of the group traversed the ridge to Ottoway Peak, a non-list peak a third of a mile to the north, while some returned to camp. After a lunch in the warm sun, the 19 remaining climbers made the ascent of 11,699 foot Red Peak, and from there 7 hardy souls continued on to 11,574 foot Gray Peak. Four others, including the leader, continued on the ridge to the west of Red Peak climbing peaks 11,300' (approximately) and 11,109', and the others returned to camp.

On Monday an early backpack to a campsite on Illilouette Creek was made. From there 10 set out for and 9 reached the summit of 11,522' Mount Clark, an impressive 3rd class peak. Three others, under the leadership of John Peckham, climbed Gray Peak on Monday from the same campsite on Illilouette Creek. By Tuesday the climbing group had dwindled to 9 climbers and these all successfully gained the spectacular summit of 4th class Mount Starr King.

Upon return to the trailhead on Tuesday evening July 4th, the group was shocked to hear that on the previous day Don Minter³¹⁴, son of Alvan Minter, had fallen off the log that crossed Illilouette Creek and had been swept away. Both Don and his father had made the climb of Merced Peak and were with those hiking out a day early when the accident happened. The leaders and all those participating on the trip were saddened to hear of this tragedy.

³¹⁴ The public record shows that Donald Minter died in Mariposa County on July 3, 1967.

Donald Minter was almost 16 years old at the time of his death. This event underscores the hazards of crossing Illilouette Creek.

1968

May 30 '68 Bill Nelson,³²⁴ Woodside

Alan Gillespie³²⁵, Stanford. I bet Wm Kat liked this climb.

I was fortunate to contact Dr. Gillespie, and he sent some details about his climb to me:

³²¹ Rearick had six first ascents in Yosemite Valley: Camp 4 Terror, Inconsolable Buttress, Pulpit rock East Face, Via Aqua, Rixon's Pinnacle East Chimney, West Corner Half Dome. He also climbed in other areas, Tahquitz, Colorado. The Diamond on Long's Peak was one of his first ascents of note. In 1959 Rearick earned his PhD in mathematics from Cal Tech. I remember him from Tahquitz and the Riverside County campground where he would recite Lewis Carroll poetry and walk on his hands (not at the same time). Rearick also climbed Starr King on June 8, 1957.

³²² Tinling climbed all over the Sierras for many years. On June 13, 1994 he signed the register on Mt. Gould, 13,005'.

³²³ Yosemite first ascents by Chuck Kroger: Nickel Pinnacle East Face, The Heart Route on El Capitan. At Stanford he majored in geophysics and in his senior year was president of the Stanford Alpine Club. He was the first person to climb four routes on El Capitan in Yosemite in a single season (1968-69).

³²⁴ Yosemite first ascents: Shadyside Bench, with Alan Gillespie

³²⁵ Gillespie became a professor of Geology at the University of Washington. Yosemite Valley first ascent: Shadyside Bench with Bill Nelson

This date was probably the second shot at it. I remember trying to climb it in 1965 when I was 17 and my lifetime list was Bear Creek Spire. I think my brother was along. Both he and Bill were older and more experienced which is probably why they sent me up. I remember working a friction face and then retreating to a crack system, ending on a small ledge, way below the summit. But the friction was novel to me then, and we retreated.

By 1968, Bill and I noticed that we hadn't ever made it up Starr King, so we set out late from the Bay Area and hiked down to Illilouette Creek in the dark, by Braille. Next morning, we had to wade the creek, nearly chest deep, so Bill actually belayed me across, and vice versa. I threw my boots across with the socks stuffed in them, so they'd be dry for the climb and the hike back out. But one sock blew out in transit and got soaked. Higher up, my lead, again, but this time I think we just did friction the whole way up the SE route, or most of it. At least that's how I recall it now. It was a drop-dead gorgeous day, and probably that is what inspired our message [regarding William Kat], although I don't remember writing it.

Actually, a few friends from school had a similar experience with Illilouette Creek in the winter, when one tried to throw his skies across. One ski made it, the other slid back the opposite snowbank into the creek and was lost. There's a long story about their trek back out.

Again it seems that the most perilous part of the trip up Starr King is Illilouette Creek. It can be avoided by coming up from Happy Isles or by waiting until late August when the water level has gone down.

May 31, 1968.

East Face 5.6 1st? [added by an unknown party] No. Done by Bruce
Cooke and companions 1964

Thunder storm approaching.

Roebig, Distler and Schroeder are listed as the first ascenders of this route in Southern Yosemite Rock Climbs and in Ed Hartouni's list on the Yosemite Climbing Association website. However, based on the register, Bruce Cooke along with his brother and nephew did the first ascent of the East Face on October 12, 1964. To Roebig and party's credit, they put a question mark after their claim.

³⁵⁰ Dr. Kuizenga worked at Stanford in the physical sciences, specifically microwaves.

³⁵¹ Irvin also ascended Starr King on June 27, 1964. Irvin was a climber of note in the Stanford Alpine Club, along with Mowat and Clinch, who climbed in many mountain ranges of the world. He died in 2006. The American Alpine Journal had an obituary for him by Nick Clinch in the 2007 edition.

³⁵² Also climbed Starr King on May 21, 1977, July 19, 1980.

³⁵³ Distler's other ascent of Starr King was on March 28, 1970

Carl P. Amundson III

Dynamite Bros.

May 30, 1971 The Dolt³⁸⁸ Strikes Again

The May 30, 1971 solo climber in threatening weather signs himself "The Dolt". He is William (Bill) Feuerer who also made also made an ascent of the peak on October 22, 1955. He was probably in Yosemite Valley for the Memorial Day weekend to hawk his equipment as the new climbing season unfolded and made a quick dash up Mt. Starr King. Sadly, within seven months this great manufacturer of climbing gear was dead at age 39, a suicide by hanging on Christmas Eve 1971. Bill was a slow speaking, gentle person, and so became nicknamed "dolt" by another climber. It stuck and he named his business after it. Even today the Dolt and his equipment are legendary in the rock-climbing community.

³⁸⁸ Feuerer also ascended Starr King on October 22, 1955

Roger Route, Fearless Leader³⁹²

Sarah Mavis

Charlie Sinclair³⁹³

Lindsey Clark

Patty Green

Because the date of the climbs for Conrad Gundke's party and that of The Dolt (previous page) were the same, I was curious to know if they climbed together. I was able to contact Conrad and he had these comments.

This was an annual, "first climb of the year" outing for us. It was not a group Sierra Club outing in 1971, although the two families were Sierra Club RCS members from San Jose. I always enjoyed leading the climb since it was easy and allowed us to get our wives up to the summit.

Howard Lewis³⁹⁴ wrote a climbing book, "You're Standing on My Fingers", a family record of their climbing activities. I don't recall if it

³⁸⁹ Grundke's other ascent of Starr King was on May 31, 1968

³⁹⁰ Pat Lewis' entries are on May 30, 1964, and May 31, 1968.

³⁹¹ Howard Lewis' entries are on July 5, 1963, May 30, 1964, and May 31, 1968.

³⁹² See also July 18, 1970

³⁹³ Also climbed Starr King on May 21, 1977

included much from the Sierras since Howard and his family came from the New York area and much of the book was with reference to the Shawangunks.

As I recall, there was no one else on the Southeast face in 1971, however, when you are on the summit you cannot see any of the alternate routes so someone could have been there without the other party being aware of them. We were not aware of any other climbers on the peak while we were there.

Conrad also sent along a photo looking down the climbing route.

May 1971 on the Southeast face route

I bought a copy of Howard Lewis' book on the secondary market, and it was a fun read. Lewis presented an accurate picture of packing and climbing in the 1950's and 1960's. After the dedication he had a quote, "The charm of mountain

³⁹⁴ Under the name of H. Warren Lewis published in 1969 in Berkeley by Howell North Books.

climbing lies not in the climbing, in success, nor in failure, but in the great range of emotions provoked through these physical experiences. – Frank Smythe”

The characters in the book include Howard, Dusty (wife), Greg (son) and Dee (daughter) plus others mentioned along the way. Some in this register were Dave French, Bill Scoville, and Fred Beckey. Contrary to Grundke’s assertion, the book is not mostly about the “Gunks”.

Mike Sherrick³⁹⁹
Natalie Sherrick
Weather here's better than Alaska.

Regarding Ned Gillette's entry, someone took exception to his recorded time from Yosemite Valley to the peak summit. However, Gillette was a collegiate cross country champion and an Olympic athlete and quite a fantastic adventurer, mountaineer, skier, and so on. One needs to be careful in making judgments. Gillette was killed by bandits in Pakistan. His career was so well covered that there is no lack of information to be found about him on the Internet. "Gillette's extraordinary string of adventures included the first one-day ascent of Mount McKinley (in 1978, with Galen Rowell), the first American ascent of China's 24,757-foot Muztagata (1980), and the first telemark ski descent of Argentina's Aconcagua." Outside Magazine, November 1998

³⁹⁹ Mike Sherrick was on two first ascents in Yosemite Valley, and they were good ones: the Northwest Face of Half Dome and the Sacherer Cracker. Mike and I were together on the first ascent of Mt. Senyala, a sandstone peak near the Havasu Indian Reservation in Arizona.

Last night above Nevada Falls,
some bears ripped off our food.

Mark McPherran. A little shaky.

In addition to his Angeles Chapter awards, Doug Mantle has also been recognized by national Sierra Club with the Francis Farquhar Mountaineering Award in 1994. He has climbed the highest mountain on each continent, including Everest in 1992. In his role of outings leader, he has been a sterling motivator and trainer, making major in-the-field efforts to develop new leaders and to assist his fellow mountaineers in attaining their goals.

⁴²¹ Grasso's other ascent of Starr King was on August 11, 1974

⁴²² This is the first entry in this register where a small peak symbol over a number appears for a member of the Sierra Peaks Section of the Sierra Club. It signifies, in this case, that this ascent is the 7th peak on the SPS list for this climber. In the transcription here forward I bracket the number thusly, /7\, to show the peak symbol.

⁴²³ Mantle's other ascents of Starr King: October 4, 1975, August 7, 1983.

⁴²⁴ Other Starr King ascents on August 11, 1974, August 26, 1977

⁴²⁵ From a line in the 1970 movie "Little Big Man", starring Dustin Hoffman.

Plenty of snow, cramponed right up.

Randy Sexton, Redwood City

Margi Rusmore – can see the Coast Range

Jane Tracy

Fer Gates

Whoever made the October 27, 1973 entries with Muir's and Anderson's names had a knowledge of history as the Opim Station was a post office in Big Meadow which only lasted about a year beginning in 1882. George Anderson, the second ascender of Mt. Starr King, had a cabin in that locality. The statement "some water in mortars" refers to the natural pot holes on the lower dome coming up the southeast route (Anderson's).

7-11-74 Young, healthy and happy. Made a nude ascent up SE face. Sun energy!! And I'm so glad to be alive.

Leslie Appling⁴⁴⁹

Starrk naked on Starr King. 2nd ascent via S.E. face. Beautiful day after 3 days of winter. 360 degree view.

Brad Schmitt⁴⁵⁰. Climbed totally "clean"

I was concerned that Ms. Appling might, at this later stage of her life, object to her entry being made available to others, so I contacted her, and asked if it was OK. She replied in the affirmative and also said,

Hi Bill, that brought a smile to my face!

I have no problem with that entry being included.

Shoes, harness and shades - a great way to climb!

⁴⁴⁹ In a list compiled in 2007 by Ed Hartouni (Supertopo.com) of first ascents nationwide in rock climbing by all female teams, Leslie Appling had three. The list contained only 23, so she has to be counted as one of the most adventurous female climbers – as her attire on Starr King would suggest.

Duane McRuer was a graduate of Cal Tech with a Masters Degree who became known as the father of aircraft control systems. He was also an avid mountaineer and contributor to the Angeles Chapter of the Sierra Club, which he joined in 1962. He played a major role in creating the Leadership Training Program for the Sierra Club. He was the Chair of the Sierra Peaks Section of the Sierra Club in 1976. He climbed all 297 mountains contained on the SPS list by 1985, and by 1997 had visited or climbed the high point in all fifty states, save one, Mount McKinley in Alaska. He also climbed all of the 97 mountains contained on the Sierra Club's Desert Peaks list twice. He was awarded the Sierra Club's Oliver Kehrlein Award for Outings Leadership (1997) and the Sierra Club Angeles Chapter's Lifelong Service Award (1998) among many other honors. Duane continued to climb peaks well into his eightieth year. His energy, endurance, and knowledge of geology made him a favorite and inspirational companion to all who accompanied him on the many hiking trails and climbing routes here in California and across the United States.⁴⁵⁶

⁴⁵⁶ This writeup about Duane McRuer was lifted in part from the website, <http://www.cest.us/news/2007/20070202mcruer.php> Much was written by Doug Mantle who climbed the peak on July 1, 1972, October 4, 1975 and August 7, 1983

Dear old patient Borsley
brought me up here for my
3rd climb. That experience
I can fly.

Ellen Searby, Angels Camp
Urmars Franosch⁴⁵⁹

Rob Frick
Russell Kohler
NW Face somewhere

Urmars Franosch made the following comments about this venture to Mt. Starr King:

Our ascent was definitely in 1974, not 1972.

Ellen Searby, who climbed with Chris Denny and me, is an interesting person with a long history in Yosemite. She was close friends with Warren Harding and was at the top to greet him on the first ascent of the Nose of El Capitan in Yosemite Valley. When I knew her in the mid 70's she was an avid cross country skier and member of the Yosemite Nordic Ski Patrol with Chris and me. She spent summers flying around solo in the Alaska bush in a single engine plane. The last I heard about her was that she was growing wine grapes near Sebastopol, CA.

Chris Denny is a remarkable person. He was a mentor to me and numerous other young wannabe climbers. His patient and encouraging

⁴⁵⁷ Beverly Johnson was a party to nine first ascents in Yosemite Valley. She was one of the truly great female climbers. She died in a helicopter crash on April 3, 1994 in Nevada. This ascent is the first all female ascent of the peak, coming two years after the passage of amendments to title 9 of the Equal Employment Opportunity Act which gave women more chances to excel in sports.

⁴⁵⁸ Chris Denny's other ascents of Starr King: May 20, 1962, September 7, 1967, July 7, 1968, October 26, 1969, June 20, 1970, August 7, 1971, June 4, 1972, July 21, 1973

⁴⁵⁹ Franosch's other Starr King ascent was on July 21, 1973

instruction and passion for the mountains had a lot to do with my decision to pursue a life of climbing. Back then we felt that reaching a summit, inaccessible by other means, was a more worthy climbing objective than just climbing up some face to an anchor. I chuckle now when I think of the arduous approaches we endured just to climb to the summit of some obscure pinnacle. With Chris I climbed Sentinel Spire, The Block, Split Pinnacle, The Rostrum from the notch, Pulpit Rock, as well as the east face of Mt. Whitney.

I can't overstate the influence Chris had on the course of my life. I credit him with inspiring me to follow a healthy life, when I could easily have gone in other directions. Growing up without a father, Chris gave me valuable tips that I would have missed during a crucial time. I remember he told me once that bowling alleys were good places to pick up women. That one I never did follow up on!

Ken Prickett, Huntington Bbch Cal.

Thanks Dave Willis and Jeff Barton for your patience.

Craig McLeod, Santa Barbara

Lawrence Henry Cates, Woodside Calif.

Pamela Helmick, Marina California, Westmont College

Wintertrek was organized by Dave Willis at Westmont College in order to introduce others the wilderness. It was no mean feat getting his group of people up Mt. Starr King in January, and not without risk had the weather turned. However, the years of 1976 and 1977 were extremely dry, to the point of water rationing in many towns in California, and this certainly worked in Wintertrek's favor. Westmont College is a Christian liberal arts college in Santa Barbara with

⁴⁷⁶ Other ascents on January 12, 1976, January 24, 1976 and January 25, 1976

⁴⁷⁷ See also January 13, 1976

⁴⁷⁸ Lorentzen's other Starr King ascents were on September 26, 1975 and January 26, 1976.

⁴⁷⁹ Willis also climbed Starr King on February 2, 1972, November 30, 1974, September 26, 1975, January 3, 1976, January 12, 1976, January 13, 1976, January 24, 1976 and January 25, 1976.

⁴⁸⁰ See also January 12, 1976

⁴⁸¹ See also January 12, 1976 and January 13, 1976

an enrollment of about 1400 students, and it is a testament to Willis' drive that he got such a group out in the wilds in winter. Willis today works for conservation causes in southern Oregon. The next eight pages of the register are from Willis' Wintertrek. Some of the entries are quite touching as they are from neophytes with no previous connection to the granite domain.

The registers give information about the increased participation of women in the activity of rock climbing and peak bagging. Year by year statistics of women climbers of Mt. Starr King are not informative as the numbers are too small. In order to be able to spot trends, the data has been summarized at the 10 year level:

Years	Male Ascents	Female Ascents	Percent Female
1931-1940	141	16	11.3
1941-1950	66	13	19.7
1951-1960	135	21	15.6
1961-1970	271	39	14.4
1971-1981	511	121	23.7
Total	1124	210	18.7

The post World War II decades show a significance increase in the participation of female climbers on Mt. Starr King, decade by decade, in the number of female ascents.

The first all female team to climb the peak was on August 21, 1974 by Bev Johnson and Lynn Hammond. The first solo climb by a female climber was on September 7, 1976 by Celia (no last name given).

Winter trek II - Westmont College

(Farmer Fred)

Santa Barbara

Fred McIntosh - 1st ascent up
Starr King, was great. So
clear you could see the coastal
Range. Come up S.E. saddle
via skateboard, leaving to
catch the face of Half Dome
before the sun goes down.

1/25/76

Dave Spencer - another member of
Westmont's Wintertrek. Randy, you
may have beat me up, but
did you climb up the West
face on a one-handed handstand?
I did. Time for lunch, Bay, do
I hate sardines. Well people,
I love you all, Bye for now.

January 26, 1976

We made it! - Way to
develop those calves! It's so
beautiful and peaceful up
here. - Worth the tired bod.

Mary Jane Ferrone

Jan 25, 1976 Wintertrek II – Westmont College, Santa Barbara

Fred McIntosh (Farmer Fred) – 1st ascent up Starr King, was great. So clear you could see the Coastal Range. Came up SE saddle via skateboard, leaving to catch the face of Half Dome before the sun goes down.

Dave Spencer – another member of Westmont's Wintertrek. Randy, you may have beat me up, but did you do the West face on a one-handed handstand? I did. Time for lunch. Boy, do I hate sardines. Well, people, I love you all. Bye for now.

Mary Jane Ferrone. We made it – way to build those calves. It's so beautiful and peaceful up here – worth the tired bod.

1/25/76

John Allen Hammeiland, Jr. - Hand
- torn up but well worth it. Fabulous
view. First of line to scale a moun-
tain. What a Bonanza!

This is the warmest you have had
up here. No bad Danheiser coat
spell. But he letted out to
much & goes out with

- Monica Rainor - Wintertube II

Praise God!! A beautiful Sunday
excursion - no sweat! ha... hurt like
hell, feel like I'm in heaven. Never
hurt so bad from last day's fall but I
have never felt like I've accomplished so
much. God is good and I feel great.
Homebaby! Go for it baby cakes!

⁵⁰² He also ascended Starr King on October 10, 1979.

⁵⁰³ Corbett did two ascents of the dome on this date, May 26, 1976. His other ascent of Starr King was done on October 10, 1979.

⁵⁰⁴ Chuck Pratt, one of the all time great climbers in Yosemite Valley, had 46 first ascents there. He apparently knew that a couple of young ladies were on their way up Mt. Starr King in the following days and thought of a sly thing to do – make a run up the peak and leave them a message. As the register reveals, Pratt's effort was for naught as the ladies did not make the climb.

Undated⁵¹⁰ Carrying on the Curry tradition we left work at the Wawona Hotel yesterday to return to work today at 3:00. Clear and sunny, slept on the slopes. Hello Pouv, 9/3/38⁵¹¹

⁵¹⁰ This entry has no names associated with it and is undated. It appears to be in proper order, so sometime in August, 1976 is assumed. The reference to 9/3/1938 is a mystery - only one ascent on the peak was made that day by Kat, Pellegrino and Emanuel.

⁵¹¹ This reference is not clear. Three names appear in the register for September 3, 1938: John Emanuel, Fred Pellagriso and William Kat. None appear for March 9 (European date notation). Emanuel is the name for the Messiah and pouvoir is power, so perhaps this is a religious reference.

Rita Whitney (I have yet to climb Mt. Whitney!)

⁵¹³ Refers to Bob Locke. In his honor a climb was named in Yosemite Valley, "Bob Locke Memorial Buttress"

UPON A BRIEF READING OF THIS REGISTER
I'D SAY I'M ENTITLED TO SOME SORT OF
RECORD ASCENT, CONSIDERING MY HANDICAPS.
THE PLASTER FULL LENGTH LEG CASTS
NEVER REALLY BOTHERED ME TILL I GOT
ON THAT 3RD-4TH CLASS FRICTION
OUT OF THE S.E. SADDLE. BUT
THE FOURTEEN STITCHES IN THE BOTTOM
OF EACH FOOT AND THE PING PONG BALL
TUMOR IN MY LAUDUS MAXIMA CERRA-
BELLUM DROVE ME NUTS THE ENTIRE
2 1/2 HOURS IT TOOK ME TO GET
HERE FROM WAWONA. NOW THESE
FACTS ALONE SHOULD PLEAD MY CASE,
SO I WON'T MENTION THE FACT THAT
I HAVEN'T SLEPT FOR TWO DAYS
AND ^{HAVE} EATEN NOTHING BUT MELISSA
~~TEA~~ FOR JUST AS LONG.

AND IN CLOSING I'D LIKE TO SAY
THAT EVEN THE MOST INSECURE
FISHERMAN HASN'T GOT AN INCH ON MANY
A MOUNTAINEER WHEN IT COMES TO
LYING THROUGH HIS TEETH.

STEVEN SEREDA
AHWAHNEE WALTER
PERPETUAL SARCAST

10/13/76

10/13/76 Upon a brief reading of this register I'd say I'm entitled to some sort of record ascent, considering my handicaps. The plaster full length leg casts never really bothered me till I got on that 3rd-4th class friction out of the SE saddle. But the fourteen stitches in the bottom of each foot and the ping pong ball tumor in my laudius maxima cerrabellum drove me nuts the entire 2 ½ hours it took me to get here from Wawona. Now these facts alone should plead my case, so I won't mention the fact that I haven't slept for two days and have eaten nothing but Melissa for just as long. And in closing I'd like to say that even the most insecure fisherman hasn't got an inch on many a mountaineer when it comes to lying through his teeth.

†Steven Sereda, Ahwahnee Waiter, Perpetual Sarcast

Michael Brocato furnished this information to me about Steven Sereda in 2012: Steve died in an accident near Cloud's Rest on August 17, 1979. No one witnessed Steve's death. He was on a solo backpacking trip to Cloud's Rest and did not return as scheduled for work in the valley. The investigating Rangers think he was free climbing and fell off some overhanging rock.

Hope Mark Makes it up. left him
Sick down on the S.E. saddle

upon Such a great view,
and exciting climb too.

"were be dragons"

3/6/77 Climbed up southeast face. Very windy and iced up. Got off route on 2nd pitch, but we made it.
John Barbella⁵¹⁵
Steve William⁵¹⁶

Apr 10, 1977 Paul Roehl⁵¹⁷ with broken finger
Bill Heiman.⁵¹⁸ “Here be dragons”

Some register entries have skeptical comments about the handicaps other climbers have alleged. Paul’s story is that he and a climbing partner were on the way up the Glacier Point Apron to climb Coonyard Pinnacle. While they were on Monday Morning Slab, Harry Daley Route, a rock fall began from above on Glacier Point which included a block of granite which was of “freight train” size. To avoid death, Paul unclipped from his anchor and jumped over the west side of Monday Morning Slab to seek shelter in the open book. The problem was that he picked up speed so fast in leaping that his fall became uncontrolled, so he grabbed for a small ledge, arrested his fall and waited for certain death. In the process of reaching out and grabbing the small ledge Paul said he “felt like Batman but broke a finger.” The giant boulder hit where his belay stance had been and wiped out the bush and destroyed all trace of his pack. He concluded with “I loved climbing on the apron but there was always occasional rock fall. We were on our way up to Starr King within the hour with the finger nicely taped up.” No rock fall on Mt. Starr King - nothing is above it. Paul said in another place, “Starr King is a great place... distant yet close by, a beautiful hike culminating in beautiful granite. First time I went up there it felt almost mystical; signing the very old summit register felt like an honor, an act of communion with so many great climbers that had also been there.”

⁵¹⁵ Barbella had eight first ascents in Yosemite Valley

⁵¹⁶ William had three first ascents in Yosemite Valley

⁵¹⁷ Roehl’s ascents were on May 26, 1974, July 17, 1977.

⁵¹⁸ Heiman’s other Starr King ascent was on May 26, 1974

July 17, 77 I like this book!

†Chris Whitworth

Paul Roehl⁵³²

John Neville Joyner

Jeff Van Middlebrook. I came here with these guys above who said I couldn't be profound within. So I won't! But I came here with the ghosts of Muir, Eichorn, Starr, Clyde, Harding ⁵³³etc. So I'm happy anyway.

Jeff Van Middlebrook sent the photo on the following page. It was taken on Starr King on July 17th, 1977. His comments:

“That's me on the right in the photo, with the short-short running shorts and dark blue T-shirt. I don't recall if the photo was taken at the summit of Starr-King or at the base. Paul Roehl took the photo.

The other three guys to my left were John Joyner and Chris Whitworth, both of whom signed the register. The guy on the end was Bill Farrel

A year after this photo Chris fell 400 feet off the Glacier Point Apron to his death when his rope somehow came out of his harness as he was leading a hard pitch.”

⁵³² Sierra Club Rock Climbing Section trip led by Paul Roehl. Roehl's ascents were on May 26, 1974, April 10, 1977, July 17, 1977.

⁵³³ No evidence in this register that Muir, Starr, Clyde or Harding made it up Mt. Starr King. Only Eichorn on July 10, 1941.

July 17th 1977 on Starr King

Mike Reed

Howard A. Landman (HAL 9009)⁵³⁵

If 470V/6's weren't air cooled I never would have made it. P-1536

Up yours Big Blue!⁵³⁶

⁵³⁴ Amdahl was the only serious competition with IBM (Big Blue) in the mainframe computer market at the time of this register entry. IBM computers required chilled water to cool them whereas Amdahl came up with a method of air cooling its processors, thus the reference to 470V/6's being air cooled.

⁵³⁵ The initials of Landman, HAL, were also the name of the computer in the 1968 movie 2001, A Space Odyssey. Landman changed the numbers of the movie model, HAL 9000, to suit himself as HAL 9009.

⁵³⁶ Today Amdahl is but a faint memory and IBM marches on.

Mike Renta, Occasional Peaks Gang

Dennis Burge, Occasional Peaks Gang

Chris Osterman, Occasional Peaks Gang, China Lake CA

Chuck Wilts was a rock climber, writer, and professor at Cal Tech. He had first ascents at Tahquitz Rock and four such in Yosemite Valley. His wife, Ellen, accompanied him on two of the first ascents. The Cal Tech website had this: “The Doctoral Prize named after Charles H. Wilts has been instituted by his Caltech colleagues and was endowed by his friends, students, and colleagues as a lasting tribute to the scientist, the teacher, and the man he was. The mark of his science was excellence. His teaching was rigorous and his demands were high, but attainable when his own path of exactitude followed. Most of all, it is the man that the prize wants to honor. He loved nature enthusiastically, had a disarming personal simplicity with an engaging smile and laugh, and possessed an unbending integrity and rectitude he placed above any concerns for fame, power, or profit. He deeply respected his fellow men. The Charles Wilts Prize is awarded every year to one EE graduate student for outstanding independent research in electrical engineering leading to a PhD.”

⁵⁴⁰ The Occasional Peaks Gang were part of the China Lake Mountain Rescue Group.

Vicky Hoover SPS /189\

⁵⁴¹ The Reynolds Number comes from Fluid Mechanics. The writer is saying that the Nevada Falls are full, thrashing and crashing. A Reynolds Number of 4000 indicates a fully turbulent liquid, so 8000 is off the scale.

⁵⁴² The spelling here may say that the writer was an engineer. He can write about fluid mechanics but cannot spell “vicious” or “approach”.

⁵⁴³ The 38th parallel goes through San Francisco as seen on a plaque in the San Francisco Civic Center. Alternatively, she is from the Demilitarized Zone between North and South Korea.

⁵⁴⁴ The name of a fictional racing driver from a 1971 book, *Stand On It*. The Burt Reynolds movie came out in 1983, five years after this register entry.

⁵⁴⁵ Carole Lynn Koda. At the time of this entry, she was married to Dennis Steffensen.

⁵⁴⁶ Plowshares was often used to denote a peace movement.

⁵⁴⁷ He was active in the China Lake Mountain Rescue Group, <https://www.clmrg.org/>. A tribute to him is at this link: [January 1984 #55](#) - Carl Heller Tribute

⁵⁴⁸ Bill Hoover also climbed Starr King on April 11, 1970.

Justine Konior from
Fresno, Calif. with Sierra
Club outing. Happy I
made it to the top. Made
it in snow with an ice
axe. April 29, 1979

Nancy Collin. Beautiful up here.
George Whitmore⁵⁴⁹ – Fresno. Nancy I agree it's beautiful up here.
(Justine, Nancy, George and Doug via snow on N. side – very easy, rope
not needed.)
D.S. Harwell.⁵⁵⁰ Fine snow and view.

⁵⁴⁹ Whitmore also ascended Starr King on October 10, 1953, April 30, 1960, April 9, 1961, October 26, 1969 and May 29, 1974.

⁵⁵⁰ Douglas Scott Harwell, probably a grandson of Charles A. "Bert" Harwell (September 10, 1931 ascent). D.S. Harwell was born in Fresno, California, the town to which C.A. Harwell relocated when he left the Park Service.

They laughed !!! Said no way -

Skiied from Badger Pass Area to trail on Glacier Point Rd. Walked the rest. Came up from saddle. Brought our cameras, but forgot our Bermuda shorts and Hawaii shirts. When does winter [continued on next page]

Nita Torres' recalled another Yosemite hazard, hornets that nest in the ground: "Somewhere during the first two miles, I stepped on a ground hornet's nest and the little bastards stung me in a couple of places. Ouch! One of the hornets flew under my Vuarnet sunglasses and I thought I was going to get stung in the eye. I was screaming (like a girly girl) and Reid rescued me by quickly pulling off my glasses. The rest of the trip was fun. Loved the remote feeling. We ran into no one. Reid took me up the easy route, gorgeous views, fire burning in the distance, beautiful moon. Oh the sweet memories."

day.
James C. Quinn. Glad to be here! Hope to be back.
Lansing, A beautiful day, a beautiful view, an experience to reflect on
always. Sierra Institute. UCSC Eat the Rich Running Club.

⁵⁷⁵ One of the all time great mountaineers from the Pacific Northwest, Beckey has made perhaps more first ascents than any American climber and has a peak named for him in Alaska. He has also authored several books. Beckey and Nolting were together on a 1983 expedition to a peak in China – American Alpine Journal 1983.

⁵⁷⁶ The use of various types of parachutes and gliders is not generally permitted in wilderness areas today.

⁵⁷⁷ Watt and Raygun refer to the Secretary of the Interior at the time, James Watt, and President Ronald Reagan. Watt was the enemy of environmentalists, and “Raygun” refers to the President in a manner suggesting that the Strategic Defense Initiative, also known as “Star Wars”, was not the writer’s favorite topic.

Unaided solo.

Little Gem Suction Cups were illustrated in the 1955 Sierra Club Handbook, and the picture below was added here to give the reader a clue as to what the cryptic entry means:

78

THE SIERRA CLUB

LITTLE GEM SUCTION CUPS

For high-angle friction climbs.
With the use of the Little Gem
Suction Cups even the most
difficult overhangs become
child's play.

CAUTION: Not suitable for
use on sandstone.

1990

5-17-90 Had to get into the original register.

John Frome⁵⁸⁴

Joel Hudson

This entry was placed after the book had been superseded by a later volume, and was perhaps written on the last page where the art work was already in existence.

⁵⁸⁴ Name difficult to make out.

Appendices

Permissions

Approval to use microfilm images in a context other than in this book should be requested from the University of California Bancroft Library. To create this book I asked and received approval.

Otherwise, use is unrestricted from my viewpoint. Giving credit would be the right thing to do.

Mark Spencer's Photographs

From Mark Spencer's ascents of Mt Starr King.

September 16, 2010 - Mark Spencer, Shirley Spencer and Dan Dion

The next pages are photos by Mark Spencer of later registers. I transcribed the pages and included names in the index, but the entries are not included in the statistical tables. Perhaps one day someone will photograph the entire registers on the peak for inclusion here.

May 15, 1982

Black snow (10'?) + avalanche

from NW face. Did from

SE saddle. Snow level in

woods 7000' approx

6pm now - will get back

after dark. Nice to read my
